PLATFORM PLEDGES FOR 1908 CAMPAIGN DISTURB DEMOCRATS

Problem of Securing Unity of Action on Party Policies to Be Considered at Conference of Leaders.

MAJORITY MAY BALK

Attitude on Imperialism, Disposal of the Philippines, the Trusts, Tariff and Banking to Be Defined.

WASHINGTON—The national Democratic platform of 1908 may return to hamper the Democratic majority in the next House, the party managers foresee, unless they exercise great care.

Senator Raynor, in arguing for a national conference, says, among numerous other things:

"Our majority in the next House will be so large as to be unwieldy, and there is danger of division over minor matters when there should be absolute unity on all propositions of party policy."

While Mr. Raynor did not say so in his published interview, it is known from his private conversation that he has the Denver platform well in mind in asking for a national conference. To repudiate that platform would be for the party, as represented in the next House, to announce that it did not expect anything in 1912; while to live up to it in every respect would also be to invite disaster.

In 1900, it will be remembered, Mr. Bryan paraded anti-imperialism, with special reference to the Philippines, and this doctrine has been repeated, for the sake of consistency, in Democratic national platforms since that time.

It is rather interesting to note that a suggestion that the Democrats, now that they are coming into power, get ready to carry out that part of their platform, should come from Japan. A cable from Tokio, published in American newspapers a few days ago, contains a statement by Count Okuma, a leading Japanese statesman, that American Democrats, being opposed to imperialism, ought now to be willing to dispose of the Philippine Islands.

The Okuma statement is taken here to mean that Japan would begin negotiations for securing control of the islands if a Democratic government were installed in this city, for the personal opinion of some Democratic leaders heretofore has been in favor of more than Philippine independence; it has been in favor of turning the islands drift.

The new tariff board will probably be unable during the coming short session

(Continued on Page Four, Column Six.)

MR. HADLEY BACK FROM U. S. MISSION

NEW HAVEN, Conn.—Arthur T. Hadley, president of Yale University, returned here today from Europe, where he studied the money markets of England and Germany as chairman of the national commission to investigate railroad stocks and bonds.

He also represented Yale at the centennial of the University of Berlin, where he delivered the Roosevelt lectures.

INSTRUCT POSTAL STATION HEADS

Nearly 70 superintendents of postal stations in the Boston postal district and a dozen department heads in the central office met and listened to a talk today given by Postmaster Edward C. Mansfield in the federal building.

These meetings are held regularly every month. The postmaster spoke about routine postal matters and gave some valuable information in regard to handling the holiday business.

Especially Attractive to Men and Women of New England.

The publishers of The Christian Science Monitor express the opinion that New Englanders especially will be interested in the big 96-page anniversary

THANKSGIVING NUMBER

of this national daily newspaper, to be issued Wednesday, November twenty-third. This immense periodical is "Made in New England" and represents the culmination of two years of pioneer work in the field of clean journalism. Of course it will amply cover not only subjects of interest to New England but also to the entire world.

ORDER TODAY FROM YOUR NEWS DEALER AND
THUS BE SURE THAT THE THANKSGIVING NUMBER
REACHES YOU PROMPTLY. TEN CENTS THE COPY.

Boston Banker Forecasts Probable Recommendation on Reform of the Currency

(Photo by Chickering.)

JOHN W. WEEKS.
Massachusetts congressman, who says the monetary commission will probably report next summer.

DISSOLUTION ORDER BY PREMIER ASQUITH FOR TEN DAYS HENCE

(By the United Press.)
LONDON—Parliament will be dissolved on Nov. 28, according to an announcement by Premier Asquith today. This insures the general elections before the holidays.

The premier was defiant when he arose to address the House of Commons and made it plain that the Liberals were determined that the people should have the opportunity to say whether the Lords were to be retained as part of the British legislative system.

"It is useless to continue the farce longer," said the premier. "To reform the House of Lords and at the same time permit it to retain its right of veto necessarily legislation is simply to make a farce of government. The proposals of compromise that have been made have not been for the interests of all of the people."

"The government has a distinct program planned and that program is to be carried out. The cabinet has discussed all of the proposals of compromise and has decided that none of them is feasible. It has therefore recommended to King George that Parliament be dissolved Nov. 28."

The announcement that the parting of the ways had been reached was received with loud cheering from the benches occupied by the Liberal members. After the session adjourned they hurried to congratulate the members of the cabinet and then started the machinery of the election.

The news that the break had come and that its compromise proposals had been rejected was given to the House of Lords by Lord Crewe, leader of the Liberals in the upper chamber. As he made his statement there came a lush ovation. All of the hereditary members felt that the announcement meant the end of their activity in the public life of the empire.

MYSTIC BRIDGE WORK IS HELD UP

Postponement of the building of the north draw of the Chelsea-Charlestown bridge seems likely today.

The loan order of \$250,000 sent to the city council by Mayor Fitzgerald will, according to Councilor Kenney, be held up until such time as the Legislature can pass on a proposition to divide the expense.

MONETARY PROGRAM TO BE DEFERRED TO MIDDLE OF THE YEAR

Congressman Weeks, Massachusetts Member of Commission, Says Rush Program Is Not Contemplated

CENTRAL BANK PLAN

Measure Favored by Majority, He Expects, Will Contain Provision for Something of That Nature.

The report of the national monetary commission will probably be made during the summer of 1911 and will favor something in the nature of a central bank, said Congressman John W. Weeks, a member of the commission, in an interview today.

There is some talk of making a preliminary report to Congress at the term which begins in December, he said, but this point has not yet been decided. At any rate, there will be no attempt on the part of the Republicans to carry out any currency reform measures during the short term to come, he thought.

Much interest has been expressed in banking circles over this latter point, as it has been surmised that the Republicans might try to put through their currency program during the coming term in view of the fact that the Democrats will be in control of the House for two years thereafter.

Asked if he thought the Democrats would necessarily be hostile to the propositions embodied in the report of the commission if it were sent to Congress while the Democrats were in the majority, Congressman Weeks said that they would probably oppose emphatically any attempt to revive the old central bank or anything approaching it in scope or nature.

Democratic opposition to the central bank scheme, inherited from the days of Andrew Jackson, has become too deep-rooted to yield, he thought, even to the present popular outcry for a reform in the currency system of the country.

Banking men of the state have thought that the Republicans in Congress might compel their Democratic opponents to put themselves on record on the currency question by forcing a vote on some currency measure of importance to the nation during the coming short term. It was thought that the Democrats, by opposing a popular measure might injure themselves with the voters and that this step could be used as campaign material by the Republicans in 1912.

Mr. Weeks did not know of any such plan. He did not believe the Republican leaders would force the issue on their opponents.

Asked why the currency question was not made a campaign issue this fall, Mr. Weeks said that the people of the country are not interested in the subject of currency reform at the present time. The whole question is in the hands of the monetary commission and until this body makes its report agitation on the currency question is not likely to be resumed.

Much work will be done on the report of the commission by its members as soon as the short term closes in early March, said Mr. Weeks. Those who compose the commission are among the busiest men in Congress when it is in session.

(Continued on Page Five, Column One.)

FAST FREIGHT BOATS TO BE REMODELED FOR BOSTON SERVICE

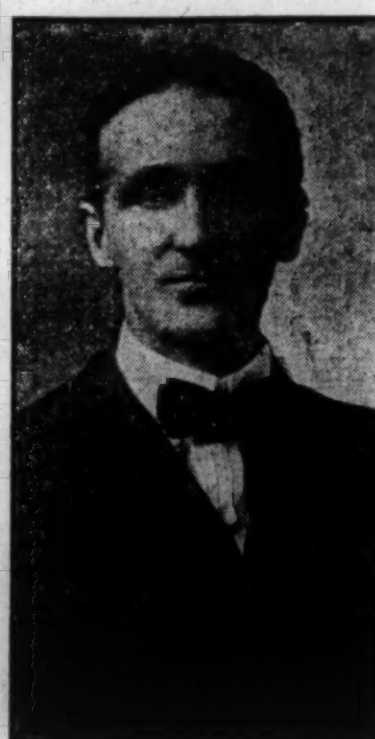

Official confirmation was given today by President Calvin Austin of the Eastern Steamship Company, of the report that the triple-screw freight steamships Old Colony, Massachusetts and Bunker Hill, formerly in the New York, New Haven & Hartford railroad service on the sound, are to be placed in service between New York and Boston next spring in place of the former Metropolitan liners, Harvard and Yale, now on their way to the Pacific coast.

Mr. Austin said he thinks one of the three boats destined for next season's service of the Metropolitan line will be kept in reserve for emergencies, following the example of the Eastern Steamship Company which always keeps a steamer ready for service on short notice to take the place of any vessel of its line that might be disabled.

The Old Colony, Massachusetts and Bunker Hill have been licensed to carry 1000 passengers each, and are expected to carry average lists of about 600. These vessels have departed from Providence and New London for Philadelphia where they will be remodeled.

The steamers are 375 feet long, 52 feet wide, carry a crew of 40 and make 25 knots an hour with 5000 indicated horsepower.

FOR NEW ENGLAND'S EDUCATIONAL GROWTH

ROYAL COLLEGE OF ART EXHIBIT COMES TO BOSTON

School of Museum of Fine Arts Is Showing Collection of Studies From Famous London Institution.

A traveling exhibition of the works of pupils of the Royal College of Art, London, is on view at the school of the Museum of Fine Arts for the benefit of students and public. The exhibition is free and will remain on view until Dec. 7.

The 60 exhibits include etchings, original mural studies and copies of the decorations of famous chapels and choirs, color designs for tapestries and color printing of cloth, and bas reliefs. The school authorities regard the exhibits as of high order of merit and of much value to the students of the school, showing as they do the picked work of one of the best foreign schools.

The exhibit was recently shown in Providence to which it was brought from England through the efforts of Director Elliott of the Rhode Island School of Design. From Boston the pictures go to Syracuse, N. Y.

MUNICIPAL LEAGUE'S COMMITTEE OF NINE BEGINS SELECTIONS

This afternoon the committee of nine appointed by the Citizens' Municipal League to name candidates for the city council and school board to be endorsed by the league, began their work.

It is expected they will be ready to report to the league next week.

Bernard J. Rothwell, president of the Chamber of Commerce and chairman of the committee of nine, called the first meeting of the committee for noon today.

According to Mr. Rothwell the committee has in the first place to get together and in an informal way canvass the situation and reach some determination as to just what will be expected of them. In consequence, he only called an informal meeting.

Whatever the decisions today nothing will be given to the public until after the first formal meeting.

The various members of the committee are adverse to discussing the situation or the possible candidates for the three places to be filled in the city council and the two places on the school board.

Not only is the committee to devote considerable time to the picking of the three candidates for the city council but the mention of candidates for the school committee will be seriously considered, and an endeavor will be made to give endorsement only to candidates who can successfully combat the strong opposition.

The fight of a year ago between the present mayor then a candidate for the first time under the conditions of the new charter, and the Citizens Municipal League, which was supporting James J. Storrow, will be continued in the school committee fight.

LANDREGAN SLAYERS GUILTY.

SALEM, Mass.—The jury in the superior court today returned a verdict in the first degree against Wassili Ivanowski and Andrei Ipsen, who shot Thomas A. Landreagan, a shoe manufacturer, and Patrolman James H. Carroll, in Lynn on June 25. Chief Justice Aiken immediately sentenced them to be electrocuted March 5, 1911.

CROWDS STREAMING TO ELM CITY FOR HARVARD-YALE GAME

NEW HAVEN, Conn.—Preparations went forward apace today for the Yale-Harvard football game at Yale field tomorrow. The hotels filled up with the advance guard who added the support of possession to reservation of the small hostelry facilities of the city since the old New Haven house has been closed to the public and dismantled. The football management has discouraged parties who wished to come today and remain over for tomorrow's game on account of the inconvenience these crowds would encounter with the poor hotel facilities here. In future years the New Haven house will help materially to provide accommodations for the visitors.

The New Haven road will run a total of 40 extra trains from New York and Boston. Some of the football parties tomorrow will be headed by Mrs. E. H. Harriman, J. P. Morgan, Mrs. W. K. Vanderbilt, George W. Perkins, Harry J. Blair and Harry Payne Whitney. Probably 20,000 people will arrive here by train between 11 and 1 tomorrow.

Much criticism is being directed toward the Yale football management by graduates and non-graduates who have been unable to obtain tickets for the game. The applications have been heavier this year than ever before in the history of the Yale-Harvard games. The situation seems to point to the need of a great stadium seating 50,000 or 60,000.

Only the prospect that some person will come forward with such a gift to the university makes reasonable the hope that Yale will some day have stands enough to care for the crowds which want to attend their annual game.

The spectacular side of the crowd will be its grand march through the city's streets and to the field—a long line of bright and animated color. Offers of \$50 and \$75 a ticket are common, but so far there has been discovered no speculation.

Only the prospect that some person will come forward with such a gift to the university makes reasonable the hope that Yale will some day have stands enough to care for the crowds which want to attend their annual game.

BROOKE MILL SEIZED AT CANTON JUNCTION IN DUTY FRAUD CASE

James Waters, deputy United States marshal, accompanied by Nicholas C. Brooks, and William H. Williams of New York city, special customs agents, went to Canton at noon today and attached the property of Joseph Brooke & Co. at Canton Junction, the Neponset woolen mill, in the case in which the company is charged with customs fraud.

Mr. Brooks and Mr. Williams arrived in Boston this morning and immediately went to the federal building where they had a long conference with United States District Attorney Garland. Mr. Garland is working in conjunction with United States District Attorney Wise in New York city.

The firm, which is at Bradford, Eng., is charged with customs frauds running into the millions.

Assistant District Attorney Whitney, in charge of the case, learned of the Canton factory yesterday and secured a writ at once. The seizure of the Canton factory will make the twenty-eighth attachment in the case.

AMERICAN SAILORS IN CLASH.
PARIS—According to a Cherbourg despatch there was a clash early today between the sailors of the second division of the American fleet and French soldiers.

BOSTON CONVENTION TAKES UP PART-TIME AND NIGHT SCHOOLS

Assembled Educationalists Discuss Problems of Industrial Training for Workmen of Future.

DR. SNEDDEN ASSISTS

Speakers Emphasize Fact of the Rejuvenation of Ancient Theory of Necessity for Trade Tuition.

"Part-time and Evening Schools" was the subject of the National Society for the Promotion of Industrial Education in the hall of the Boston public library building.

Dr. Paul H. Hanus, professor of education, Harvard University, presiding, introduced W. B. Hunter, who is director of the industrial department, Fitchburg high school.

Mr. Hunter described the cooperative industrial course of the school, whereby a boy goes to school one half of the school period of 20 weeks, and works in the shops of the various manufacturing of the city 30 weeks a year.

Adelbert L. Safford, superintendent of schools, Chelsea, followed with a description of the Beverly industrial school. The bookwork of the school is carried on in regular school buildings maintained by the city of Beverly and the shop work is maintained as a separate department organized by the United Shoe Machinery Company. In the factory a department is fully equipped and reserved for the exclusive use of the school.

Frank R. Dyer, superintendent of schools, Cincinnati, spoke on the part-time system as developed in that city, and was followed by Stratton D. Brooks, superintendent of schools, Boston, who discussed the evening schools of Boston. He was followed by C. A. Prosser, deputy commissioner of education, who described the organization and purposes of the evening industrial schools of Massachusetts.

In summing up the papers of the session, Dr. David Snedden, commissioner of education, said that it is now generally conceded that all successful vocational education involves two fundamental aspects, viz.: practice, and the study of practice and related theory.

"The second part of this education can be given under school conditions; the first part must be obtained under shop."

(Continued on Page Five, Column Four.)

HEARING ON B. & P. ROUTE IN HYDE PARK FAVORS SALLY'S ROCK

After many continuances the state board of railroad commissioners brought to a close today its hearings relative to the route which the proposed Boston & Providence interurban electric railroad shall take through the town of Hyde Park. The preponderance of testimony presented was in favor of the Sally's Rock route and against the west or Providence street route.

L. P. Winchenbaugh said the only argument advanced for the west route was that it would open up an undeveloped territory, but the Sally's Rock route does that and more, for it provides transportation facilities for the Fairmount section of the town, which now has nothing but a steam railroad line.

R. W. Karnan said his first choice of routes would be to have a subway running from Forest Hills in Boston to Readville square in Hyde Park, under Hyde Park avenue. He said, however, that the expense of such a proposition would probably make it prohibitive, and he was therefore in favor of the Sally's Rock route.

The board closed its hearing with respect to Hyde Park, but on Dec. 7 will take up the location in towns on the southern end of the proposed line, particularly in North Attleboro.

CAPITAL TO SEE MR. ROOSEVELT

WASHINGTON—Theodore Roosevelt will arrive in the national capital at 4:20 p. m. today for his first visit since he left the White House for Oyster Bay on March 4, 1909.

He will be met at the Union station by representatives of the National Press Club and the National Geographic Society. He will go directly to the Press Club for a reception at which he is to be the guest of honor. He will address the Geographic Society tonight on "Wild Beasts and Wild Men in Africa." Press Club members have been requested to bring no friends and the 5000 tickets for the lecture tonight at Convention hall have all been sold.

HOME MARKET CLUB VOTE NOT FINAL ONE TO SPEAKER WALKER

He Is Unwilling to Accept Adverse Verdict of Small Representation on Mr. Taft's Tariff Plan.

POSTAL CARD VOTE

Request Is Sent to Entire Membership of 1000 to Respond With Expression of Opinion on the Subject.

Speaker Joseph Walker of the Massachusetts House is unwilling to accept his defeat in the Home Market Club on Wednesday as final.

He has begun a canvass of the entire membership of the club in an effort to learn their attitude toward his resolution endorsing the tariff policy of President Taft.

He has sent a return postal card to each member, printing his resolution in full, with the question: "Do you favor this resolution?" and an opportunity for an answer "yes" or "no."

On the other side of the card is this communication by Mr. Walker:

"Dear Sir: The resolution attached hereto was voted down at the annual meeting of the Home Market Club, held Wednesday, by a vote of 48 to 8. The club has a membership of nearly 1000. I cannot believe that the club wishes to go on record as against the announced program of President Taft—a program which alone can unite Republicans and prevent Democratic tariff revision."

"In order to get a full and fair expression of opinion I trust that every member of the club will vote informally on the question by marking a cross in one of the squares on the attached ballot and sending to me by return mail."

The executive committee of the Home Market Club is also in the field to support the resolution which it presented to the annual meeting as a substitute for that offered by Speaker Walker.

It is sending out to each member of the club today a circular stating that it does not consider the postal card sent out by Speaker Walker to be fair in its representation of the action of the club in voting on the executive committee resolution.

Both resolutions, that of Speaker Walker and of the executive committee, are printed in full, and attention is called to the vote of 37 to 5 which passed the latter as the sentiment of the members of the club and the business men of New England. The executive committee concludes:

"We believe that the action taken by the annual meeting will meet the approval of those members of the club who were unable to be present."

HATS OFF, LADIES, MAYOR SAYS AT SYMPHONY HALL

Mayor Fitzgerald has written a letter to Louis H. Mudgett, manager of Symphony hall, calling Mr. Mudgett's attention to the statute requiring women to remove their hats in places of amusement.

The mayor says that he has received many complaints from visitors at the rehearsals and he is informed that despite the regulations printed on the programs and notices posted in the hall that most of the women at these concerts ignore the law.

Mayor Fitzgerald requests Mr. Mudgett to take cognizance of this warning and have the law obeyed.

RAILROAD HEADS AT ROCKLAND, ME.

ROCKLAND, Me.—Charles S. Mellen, president of the New York, New Haven & Hartford railroad, accompanied by Morris McDonald, vice-president and general manager of the Maine Central railroad, and 10 other prominent railroad men arrived here by special train Thursday forenoon. The party remained only half an hour and did not leave the station. It was stated that President Mellen and his associates were making a complete inspection of the Maine Central system.

It is believed that President Mellen devoted some attention to the importance of the Knox and Lincoln division as related to Bar Harbor and other summer resorts on this part of the coast.

BERLIN HONORS PROF. W. M. DAVIS

BERLIN—The Berlin Academy of Sciences today honored Prof. William Morris Davis of Harvard University by electing him to membership.

Prof. William Morris Davis is the Sturgis-Hooper professor of geology at Harvard, and lives at 17 Francis avenue, Cambridge.

News of the World Told by Cable and Correspondence

NEW PORT OF LONDON RATES MAY DRIVE TRADE FROM CITY

Old Shipping Companies Predict Loss to Business Community if Port Authorities Insist Upon Continuing Payment of Present Heavy Import Dues.

(Special to The Monitor.)

LONDON—The new rates payable in respect to all goods imported to and exported from the port of London, to which reference has already been made in The Christian Science Monitor, have come into force. As is generally the case when any new regulations are inaugurated, a great number of inquiries were made which need answering, and the officials have been busily engaged both in respect to the receiving of dues and in answering the innumerable questions that have been put to them. The new charge made is quite apart from the existing wharfage and shipping charges. Working in cooperation with the port of London authority, instructions were issued by the board of customs to the customs officials to see that the entries passed for goods imported or trans-shipped were duly attested by the port of London authority. The opinion freely expressed is that the import dues are too heavy and should be reduced, while the export dues are so small that they might be given up altogether.

Discussing the question, a member of one of the oldest shipping and forwarding agencies in London expressed his views as to the outcome of the new regulations and quoting as an example the large traffic in iron wire from Belgium, he pointed out that if the port charges have to be maintained, it will be necessary to send the goods to another port. The destination of the wire is Birmingham and, the rates via London and Hamburg being at present at a par, the purchaser will be unable to pay 7d. a ton via the former port. The existing dues would therefore result in driving trade from the port of London, and when once that had been done it would be hard to recover it.

The toy and fancy goods section of the London Chamber of Commerce have also protested against the levying of the new rates by the port of London authority. It is pointed out on behalf of the trade

concerned that the rates payable in respect of goods imported are almost without exception over 65 per cent of the maximum rates scheduled under the act, while the export rates are 25 per cent of the maximum scheduled. It is maintained that the rates affecting toys, china and porcelain, clocks and clock-work machinery and material hardware and general fancy goods are excessive as compared with the rates levied, for example on corn, coal, etc. It is objected that the new rates involve increased expenditure on clerical labor and lead to delay in the shipment of goods.

It is also pointed out that no provision is made in the list for mixed parcels of fancy goods and it is maintained that there is no justification for the action of the port authority in attempting to levy up to the full limit of their powers. A request will be made to the port of London authority to receive a deputation on the subject.

LONDONERS TO SEE FESTIVAL OF EMPIRE AT CRYSTAL PALACE

(Special to The Monitor.)

LONDON—A "festival of empire, imperial exhibition and pageant of London" will be held at the Crystal Palace from May to October of next year. Princess Louise, duchess of Argyll, is the honorary president of the ladies' committee, and the duke of Norfolk and Lord Roberts are members of the directing council which is presided over by the earl of Plymouth. The purpose of the festival of empire is in no way political, as is shown by the fact that both Mr. Asquith and Mr. Balfour are among its vice-presidents. Its aim is to make the inhabitants of the scattered lands of empire better acquainted with each other. The coronation and the imperial conference, the two great events of next year, are expected to draw thousands of overseas visitors to London and the Crystal Palace is being prepared as a common meeting ground for them.

India, Canada, Australia, South Africa, New Zealand and Newfoundland are all sending contributions to the exhibition section, each exhibit having been manufactured or produced within the empire.

The Parliament houses of all these countries will be reproduced in three quarter scale in the grounds of the palace, each house being surrounded with land arranged to look like its own native heath. In South Africa, the grounds will be laid out to represent the veldt, with gold and diamond mines dotted here and there, while the Indian part will consist of splendid palaces and teeming bazaars glowing with all the colors of the Orient. This group, which covers many acres, will thus give the effect of the empire in miniature, and a little railway, 1½ miles round, will enable passengers to visit the places named, in 10 minutes.

The English section of the ground will include old English fairs, a permanent camp of boy scouts, and a country life exhibition with real farm yards and their inhabitants. The pageant of London, which was the original idea of the promoters, will now take second place. By the time the exhibition is opened, the London, Brighton, and South Coast railway will have completed the electrification of their line to the Crystal Palace, so that passengers will be able to reach the exhibition in twelve minutes from Victoria.

ADELAIDE WANTS LORD MAYOR TITLE

(Special to The Monitor.)

ADELAIDE, South Australia—Anxious to follow the example of the municipalities of both Sydney and Melbourne which were advanced a few years ago to the dignity of lord mayoralties, the authorities of Adelaide are anxious that the mayor should be granted the permission to assume the title of lord mayor.

LAY FOUNDATION STONE FOR ENGINEERS' BUILDING

LONDON—In the presence of a large gathering of gentlemen belonging to the institution, the foundation stone of the new building which is to be their headquarters has just been laid by I. C. Inglis, the retiring president.

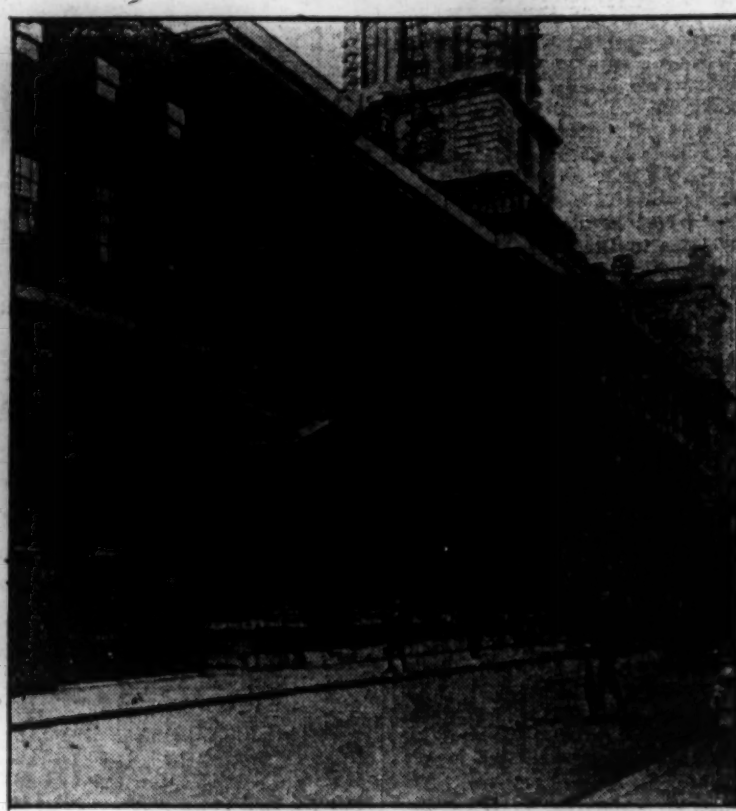

A vote of thanks to the president having been proposed by Alexander Siemens, the president-elect, he replied in an interesting speech; first stating that there was reason to believe that had he not been unavoidably prevented, his majesty the King, patron of the institution, would have performed the ceremony. Mr. Inglis touched on the higher aspects of the profession, alluding to the engineer as ever in search of truth, and as constantly endeavoring to adhere to correct principles, no pessimist, but a man who kept on in face of difficulties and discouragements. He also referred to the work of the engineer in spreading the principles of civilization, and in bringing nations and individuals nearer together. Disdaining any personal merit, he said his own career might be an encouragement to the young members of the profession. He had gone steadily about his daily task, endeavoring to see it in a higher light as something to be done for the benefit of mankind.

The site of the well known present building in Great George street, Westminster, being required for the extension of government offices, land has been obtained on the opposite side of the street, a little further west, at the corner of Great George street and Princes street, and a new and larger building from the designs of Mr. James Miller, A. R. S. A., will be erected upon it.

The Institution of Civil Engineers is the leading engineering society of the British empire and, it may be said, of the world, and has at the present time upon its rolls 9136 names, including about 2500 engaged in engineering work abroad, and in the colonies and dependencies of the empire, in addition to many upon the American continent.

The object of the institution, according to its charter, is "the acquisition of that special knowledge which constitutes the profession of a civil engineer, being the art of directing the great sources of power in nature for the use and convenience of man." This definition is held to include all classes of engineers not in the military service.

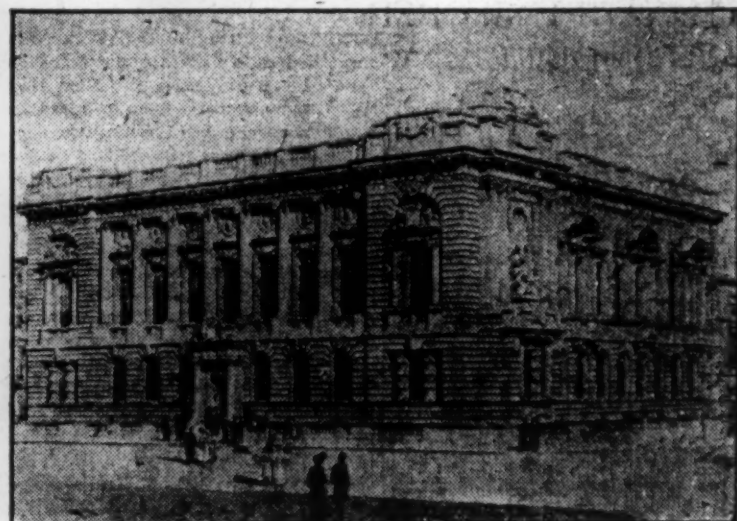

In the year 1817, being impressed with the difficulty of gaining professional knowledge, William Maudslay, Joshua

(Photographs specially taken for The Monitor.)

French Cabinet Formed in Record-Breaking Time

New ministry is accomplished fact in thirty-six hours.

(Special Correspondence of The Monitor.)

PARIS—Although immediate changes were expected in the cabinet, after the battle in the Chamber last week, anything so radical as that which has actually taken place was not for a moment anticipated. After the vote of confidence recently passed by the Chamber the question of the necessity for strengthening the cabinet by two, if not three changes, so as to enable M. Briand to carry out without any ministerial obstruction his proposed new legislative reforms and especially the proposed new laws for regulating, even if not absolutely preventing, strikes by those engaged in the public services, was freely discussed on all sides. The necessities of the situation, however, called for more drastic action and consequently much to the surprise of the country, the premier along with the whole of the cabinet resigned in a body. M. Briand was immediately charged by the President of the republic to form a new ministry and it is characteristic of the man that within 36 hours had elapsed the new cabinet was an accomplished fact, a record that has never been seen before, since the third republic has been in existence.

It must be remembered that the late cabinet was not really a Briand cabinet, for when M. Briand accepted the premiership on the fall of M. Clemenceau he took over the cabinet as it stood. It will be seen from the following list that the new cabinet comprises seven new ministers and three new under-secretaries of state.

Premier, minister of state, M. Briand; justice, M. Theodore Girard; foreign affairs, M. Pichon; war, General Brun; navy, Admiral Boue de Lapeyriere; public education, M. Maurice Faure; finance, M. Klotz; commerce, M. Jean Dupuy; public works, M. Puech; agriculture, M. Raynaud; colonies, M. Jean Morel; labor, M. Lafferre.

Under secretaries of state—Finance, M. Andre Lefevre; war, M. Noulens; navy, M. Guist'hau; fine arts, Dujardin-Beau-Metz.

The main feature about the new ministry is that none of them have hitherto occupied a place in any ministry; they are all new men, hard workers, loyal Republicans and of large parliamentary experience, and are none of them likely to be actuated by a secret desire to replace their chief, a motive which has probably in the past, been responsible for the failure of more legislation as well as for the fall of more cabinets than all others put together.

The absence from the list of M. Millerand has occasioned the greatest surprise. It had been reported for some days that M. Viviani and M. Raun were not in agreement with the premier either as to the means taken by the last ministry to suppress the recent strikes, or as to the principle of the proposed new law for the prohibition of strikes by civil servants and workmen engaged in the public services, but public opinion was hardly prepared for the exclusion of M. Millerand. The late minister of public works was an advocate of the principle that every workman whether he be a civil servant or one engaged in any of the public services, possesses the inalienable right to strike, and his proposal for dealing with labor troubles is compulsory arbitration.

M. Briand, however, whatever his private feelings may be, has by force of circumstances been driven to the conclusion that in the interests of the country it is absolutely necessary to adopt more decisive measures, and while not questioning for a moment the right of the ordinary workman to strike, he makes a definite distinction with regard to those employed either as civil servants or in the public services, asserting that the present conditions require that for this particular class of workmen the

question must be, once and for ever, removed outside the zone of political influence and agitation.

After the resignation of the cabinet some negotiations on this question took place, but these were subsequently broken off. M. Millerand's last word at his interview with M. Briand being that if the new government intended to withhold the right to strike from any class of workmen whatever, he himself could not join the ministry.

In commenting on the new cabinet Figaro says: "The dominant note of the new cabinet is that it is composed of friends ready to make any sacrifice, even the hardest one of all, that of giving up if necessary their office. They are resolved one and all to cast in their lot with that of a chief who has their entire devotion, whose moral worth, absolute sincerity, and rare courage they fully recognize."

LABORERS MAY NOT LIKE NAVY

(Special to The Monitor.)

BRISBANE, Queensland—Admiral Sir Reginald Henderson, who is at present traveling through the country for the purpose of inspecting the harbors of the commonwealth in connection with the defense scheme, said, referring to the question of the Australian navy, that in Great Britain there were always a large number of applications for enlistment in the navy. In Australia, however, there were a number of attractions for the working man, and it would be quite possible that he would be unwilling to leave the land in a country where it was possible for a man to settle and to make himself comparatively comfortable within a year. This it was not possible for a laborer in Great Britain to do.

Field, Henry Robinson Palmer, James Jones, Charles Collinge and James Ashwell founded a society which held its first meeting at the Kendal coffee house, Fleet street, on Jan. 21, 1818. Thomas Telford became its president March 21, 1820. The society grew rapidly and on June 3, 1828, received a charter of incorporation under the great seal by the title of the Institution of Civil Engineers. Supplemental charters were obtained in 1887 and 1896.

In its early days the institution occupied rooms at 15 Buckingham street, Adelphi; but in 1834 a small house was taken, No. 1, Cannon row, Westminster. This was soon outgrown, and No. 25, Great George street, which stood upon part of the ground covered by the existing building, was acquired in 1838; further extensions were made periodically until finally in 1894 the fine building, now soon to be vacated, was commenced, from the designs of Charles Barry, F. R. S. A.

This structure, which occupies the site of Nos. 24, 25 and 26 Great George street, is well known to many American engineers who have visited Europe, and is remarkable for its handsome facade, ornamented with the busts of some of the celebrated early engineers and also for the fine oak joinery work in the library.

The new building, which will have frontage to Great George street and Princes street, will occupy an area of about 21,000 square feet. It will contain council and committee rooms, reading rooms, lecture theater, great hall, library, waiting and smoking room for members, also offices for the secretary and staff.

It is intended to introduce into the building timbers and other materials from various parts of the British empire.

HOLD CORONATION DURBAR AT AGRA

(Special to The Monitor.)

LONDON—Although the actual site has not yet been selected, it is understood that the coronation durbar in India will be held at Agra. The Durbar of the coronation of King Edward VII. was, it will be remembered, held at Delhi. As soon as a final decision has been arrived at as to the most suitable site for the durbar of the coronation of King George V., the Indian office will be immediately notified.

U. S. NAVAL MEN GET A CORDIAL WELCOME ABROAD

London Corporation Votes
\$10,000 for Luncheon and
Entertainment to Be Given
in Guildhall.

LONDON—The lord mayor and the corporation will entertain a large number of the American officers and men at luncheon in Guildhall during the stay of the American fleet in the Thames.

The corporation voted on Thursday an expenditure of \$10,000 for this purpose. The date of the occasion has not yet been determined.

A large number of men from the battleship Mississippi came into town and drove about in carriages and taxicabs. PARIS—Groups of American blue-jackets visiting Paris are everywhere objects of interest and are cordially welcomed. One hundred men from the battleship Georgia arrived from Brest Thursday.

Just as they passed out of the railway station, apparently eager for the first glimpse of the French metropolis, they were repeatedly photographed by representatives of the Paris journals.

The system of giving the men shore leave in batches of 100 and 200 will be continued throughout the visit. Each group will remain in Paris five days. American Ambassador Bacon and Lieut.-Commander Chapin, American naval attaché, are arranging with an agency for excursions of the men to points of interest, including drives to Versailles and Fontainebleau.

Mr. Bacon will give a dinner to the officers of the fleet.

SCHOOL ELEVEN ARE SCHEDULED FOR BIG GAMES

Today and Tomorrow Will See Several League Contests Played in Greater Boston.

WHERE THEY PLAY

There are few school football games which have any importance to be played today, chief among these is the game between Brookline and Cambridge Latin school at the American League grounds. This game will be hard fought as it will practically decide the championship of the preparatory league. Brookline has won its game from Newton, and Latin school only tied with them, and if Cambridge defeats Brookline they will be the champions. Brown and Nichols school of Cambridge and Stone's school will contest at Chestnut Hill. To date, Noble and Greenough has the best record of the private schools, but if the Cambridge boys win from the Back Bay lads they will share the claim with Noble's.

Tomorrow there are about a score of matches scheduled. Somerville will meet Everett at Everett and as Somerville was greatly outclassed by Melrose, the Everett boys hope to win. If Everett should win they will jump from last place to a tie for second, and that would put Somerville away down at the bottom of the list. Mechanic Arts will take a trip to Fitchburg. Waltham will play at Beverly. Beverly has played good football all season, and Waltham will have no easy task in getting away from there with a victory. The high school of commerce meets Worcester high at Worcester in the game which was put over from last week. The Worcester team is recognized as one of the heaviest schoolboy teams in New England, but the speedy future business men will give them their best battle of the year. Arlington high will meet Winchester high at Winchester and on their record should leave for home with a victory. Dorchester high will have Quincy high as an opponent; but they will not have to work very hard to get a victory as the Quincy boys are not as smooth a playing team as the Dorchester team has shown of late.

CADET-BATTERY GAME PLANNED

The always keen though friendly spirit of rivalry between the first corps of cadets and battery A is due to reach a climax on Thanksgiving morning, when the Harvard Stadium will witness the annual gridiron battle between the well chosen and carefully trained eleven, representing these crack military organizations. For several years this game has been recognized as one of the leading social events of the season, aside from its athletic interests.

Some of the best football stars that have fought hard for their college and preparatory school eleven will be lined up to battle for their respective colors. The keen interest already displayed in this year's game indicates that enthusiasm will run high from the moment the opening whistle blows. Complimentary tickets are already being distributed.

INVITED TO PLAY IN WEST.
Hamilton Fish, captain of the Harvard football team, which recently defeated the Carlisle Indians, 3 to 0, has received a telegram from A. Lyman Donlon of St. Louis asking that a game be played with an all-western eleven on Christmas day in St. Louis. It is doubtful if the members of the All-Star eleven will accept the offer. However, the matter will be considered and the St. Louis promoter will be replied to within a few days.

CUBANS WIN IN 11TH INNING.
HAYANA — The Alamedas baseball team defeated Detroit here Thursday by a score of 2 to 1. It took 11 innings to decide the contest.

Crimson Veteran Who Will Face Yale Center in Big Game Tomorrow

J. G. B. PERKINS '11.
Harvard varsity football team.

LIGHT DAY PLANNED FOR HARVARD ELEVEN AT FARMINGTON, CT.

FARMINGTON, Conn.—The Harvard varsity football squad will be given the lightest kind of work today in its final preparation for the big game with Yale tomorrow. The morning was taken up with walks over the country here and a secret signal drill will be held in the afternoon, followed by more walks and probably a blackboard talk after supper.

The men are all in the best possible condition with the possible exception of T. Frothingham, who is expected to be in shape to play at least part of the game if needed. The entire squad had a secret drill on Yale field Thursday afternoon. Punting, drop-kicking and catching kicks formed a large part of the work, over half an hour being consumed by the men in the working out of all manner of kicks. Felton, Tyron, Corbett and Minot all got off long spirals, which were caught by the backfield men. Lewis, Wigglesworth and Tom Frothingham did the drop kicking. A few kicks from place and the kick-off were tried by Captain Withington and then three eleven were formed and run through a very snappy signal drill of 25 minutes. Wigglesworth at quarterback, H. C. Leslie at fullback and Corbett and Wendell at the halfback positions made up the varsity's backfield. This combination will start the game Saturday. They worked together in the best possible manner in the secret signal drill and went through all the elementary plays with speed and accuracy. There was no fumbling.

Both Potter and Leslie appeared in first-class condition and will surely get into Saturday's contest. There was no departmental drill, but the coaches closely followed all the signal work with strict attention.

HARVARD-YALE CHESS TONIGHT

NEW HAVEN, Conn.—Confident of winning, the Harvard chess team is ready for its annual 10-board match with Yale at Dwight hall tonight. For about 10 years Yale and Harvard have been meeting in chess, and during this time Yale has won but once. Twice the matches have resulted in a tie.

The members of the Harvard team are as follows: F. P. Byerly, R. B. Cooke, C. S. Hadley, W. B. Harris, A. G. Johnson, A. S. Jones, D. Rines, T. R. Schoonmaker, S. Seigner and T. Thorwaldsen.

COLE CHOSEN CAPTAIN.
LEWISTON, Me.—Arthur Russell Claiborne Cole of Gardiner was elected captain of the Bates football team for 1911 at a meeting Thursday afternoon of the men who won their B's. Cole played center on the team this year.

YALE AT MERIDEN HAS LAST PRACTISE FOR HARVARD GAME

MERIDEN, Conn.—The Yale varsity football squad will hold a secret signal drill this afternoon as a final preparation for the game with Harvard tomorrow. The squad is at the Highland Golf Club and will remain here until tomorrow morning when they depart for New Haven and the final game on their schedule.

Captain Daly has 16 players here with him and they will undoubtedly constitute the team on Saturday. These comprise the regular varsity team and five substitutes, and are as follows:

Kilpatrick L., Scully L. T., Fuller L. G., Morris C., McDewitt R. G., Paul R. T., Brooks R., Howe G. B., Field L. H., Daly R. H., Kistler F. B., Vaughan sub end, Savage sub tackle, Francis sub guard, Merritt sub quarter, Reilly sub halfback and fullback. The rest of the substitutes remain at New Haven.

The only other substitutes who are likely to get into the Harvard game are Reed at center, Deming and Potter in the backfield and possibly Bomeister at end.

The condition of the players is remarkably good, considering all that they have been through in the last two weeks. Trainer Mack has again shown his ability at handling the men.

The Yale practise Thursday was confined to a signal drill. There was no scrimmage work. The team went through it in a way that not only pleased the coaches, but gave them encouragement for Saturday's game. Every player in the varsity squad except Baker and Tomlinson showed up in good condition.

After the practise the members of the varsity eleven who will play their last game for Yale on Saturday performed the traditional Yale ceremony of burning their old clothes. A bonfire was started and each varsity player threw on the pile a piece of his football uniform. Joining hands, the men danced around the burning pile as they sang the weird old Yale song known as "Omega Lambda Chi."

The song completed, the embers were quenched and Yale's training was at an end. The team started for the gymnasium, and laborers began to cover the gridiron with a foot of straw to protect it from the frost.

HARVARD HOCKEY MONDAY.

The candidates for both the Harvard varsity and freshman hockey teams met for the first time Thursday evening. Capt. R. Hornblower '11 said that the varsity squad would begin work in the Boston Arena Monday afternoon at 5:30 o'clock unless a notice to the contrary should be posted. The schedule is not complete yet, but the first game will probably take place in the middle of December. As there are only three weeks before this game, practise will probably be held in Boston four times a week, on Mondays, Tuesdays, Thursdays and Saturdays. F. W. Paul '11 will coach the freshmen.

NEW CONTRACTS AND RELEASES.

NEW YORK—President Lynch of the National league announced approval of the following contracts and releases last night:

Contracts.—With Cincinnati, J. W. Bates, George McGilvray and R. J. Egan, all 1911. With New York, Arthur Devlin, 1911. Releases.—By Boston to Indianapolis (A. A. J. Gustave Getz). By Cincinnati to Birmingham (S. A.), Arthur Phelan.

BRITISH HORSES WIN MAJORITY OF HONORS AT NEW YORK SHOW

Practically Sweep up Board in International Event—Lord Baltimore and My Maryland Win.

OFFICERS COMPETE

NEW YORK—England nearly swept the board in the first international event at the horse show in Madison Square Garden Thursday night. Thirty-seven government horses, ridden by officers in uniform, competed for the honors.

The blue ribbon and the Canadian challenge cup went to The Nut, a bay gelding ridden by Lieut. C. F. Walwyn, Royal Horse artillery. Harriet I., a bay mare, Lieut. Geoffrey Brooke, Sixteenth Lancers, was second, and Oka, a bay mare, Lieut. R. Mallarme, First Dragoons, France, was third. Lieut. W. R. Sifton, Jr., of Canada, was fourth with Ironside, a black gelding.

When class 57, for pairs of horses from 15 hands to 15 hands 2 inches, had been judged, there was general surprise at the announcement that the first prize had gone to the bay geldings Lord Baltimore and My Maryland, the entry of C. W. Watson's Fairmont Farms.

They were placed over Judge W. H. Moore's King of the West and Queen of the West, and Paul A. Sorg's Dignity and Manhattan. When the judges were asked the reason for the sudden triumph of the Fairmont pair, they simply said that Lord Baltimore and My Maryland "were going better than they ever did before."

In point of attendance the top notch was reached. The throngs on the promenade, the packed balconies and the long list of notables who crowded the boxes all harked back to the old-time days before the advent of the motor car.

With the close of last night's program of events the international military jumping contests ended.

NAME COMMITTEE TO DRAFT UNIFORM AUTOMOBILE LAW

NEW YORK—Prominent automobilists from all over the country who met for the conference of the Touring Club of America here have declared themselves strongly for uniformity of state legislation affecting automobiles and automobiling.

J. B. R. Smith of New Jersey and Joseph Hunter of Pennsylvania have been appointed a committee to draft a proposed uniform enactment to be submitted to the legislatures of the several states. General adoption of this law would permit a car owner, having complied with the law's and requirements of his own state to tour other and especially adjoining states without being subjected to the annoyance of additional registration or time limit within a particular territory.

It was decided the legislatures of the states be asked to grant visiting automobiles 15 days in which they may be exempt from the operation of the state laws. It has also been decided to recommend to the legislatures that no person be permitted to drive an automobile in any state without having first passed such an examination as his own state requires, and further, that no person under 18 years of age be permitted to operate a car, whether or not such a person is the owner of the car.

TECH CROSS-COUNTRY TOMORROW.

Great interest is centered in Technology's annual fall cross-country handicap race which will be run off tomorrow over the eight-mile course in West Roxbury. Liberal handicaps will be given the new men and it is expected that a number of them will show up at the finish. Three beautiful cups are awarded for first and second positions and for the man making the best time over the course.

CUTLER WINS HARVARD TROPHY.

CAMBRIDGE—Roger Cutler, captain of the Harvard varsity crew, Thursday won the single scull race open to Harvard oarsmen and for a cup offered by R. F. Herrick '90. There were three starters and the course was three quarters of a mile long. Cutler won by three lengths. R. S. Parker '12, was second and C. W. Peabody '12, third.

MADDEN TO LEAD AMHERST TEAM.

AMHERST—John Harrison Madden of Binghamton, N. Y., was elected captain of the Amherst College football team last night. He plays left end and has brought notice to himself on account of his drop kicking. He is a member of the junior class.

JUBILEE'S KEEL SOLD.

The Burgess yachting agency has announced the sale of the keel and lead of the 90-foot sloop Jubilee to a Boston contractor. The Jubilee was built by Gen. C. J. Paine as a possible American cup defender, and he is to use the hull as a house boat.

BOSTON TERRIER SHOW HAS OVER 300 FINE DOGS

Second Day of Exhibit on Today With Many of the Best Dogs in Country Entered.

Over 300 of the best Boston terriers in the country are now on the benches at the Boston terrier show, the second day of which is today going on in Horticultural hall.

One of the dogs shown yesterday which attracted much interest and will be watched carefully throughout the show was Harry C. Tolman's Whisper By the Way, which won two first prizes.

Mrs. F. A. Dallen took first place in the class for senior puppy dogs with Dallen's Sport, and won a third with Dallen's Edna in the class for junior puppy females.

Henry D. Riley of Philadelphia is acting as judge, assisted by Arthur Mulvey.

In the evening the eighth annual dinner of the club was held with over 100 members and guests present. Dr. F. H. Osgood, president, introduced the following "speakers": George F. Parker, vice-president of the New York Boston Terrier Club; Samuel R. Foster, president of the Philadelphia Boston Terrier Club; Dr. C. A. White, president of the Chicago Boston Terrier Club, and James Carroll.

THREE LEAGUES ARE ADVANCED

CHICAGO—With all but a few of the many details accomplished, the arbitration board of the National Association of Professional Baseball Leagues is holding its final session in this city today and when it adjourns tonight it will have completed its work of 1910.

None of the organizations comprising the leagues will be reduced in standing. This was announced Thursday before the adjournment of the annual meeting by President Sexton. The work to be done today includes the cases of a large number of ball players and reclassification. The latter is the most important, but the keen interest has vanished, as the presidents who feared their organizations would be lowered in standing have been assured that such action will not take place this year and for many years to come.

The three leagues which are scheduled for advancement according to the population figures are the Texas, Illinois-Wisconsin and Minnesota-Wisconsin leagues. Each has shown that it is above the required figures in the present standing and is entitled to promotion. The Texas league will be moved up to class B from class C while both the Illinois-Wisconsin and Minnesota-Wisconsin will be raised from class D to class C.

CLASS SERIES STARTS TODAY.

The first of a series of basketball games between the classes at Boston University takes place in the gymnasium this afternoon. Each class plays every other class and at the end of the series the team winning the most games will receive gold watch fobs, donated by the athletic association. The games today are between 1911 and 1912, and 1913 and 1914.

HACKENSCHMIDT WINS.

George Hackenschmidt threw Maurice DeRiaz, the Swiss heavyweight champion, in two straight falls, in 18 and 15 minutes, respectively, at the Boston Arena last night.

RATIONAL GOLF

By JASON ROGERS

There is no holiday of any kind that is capable of yielding richer delight, or a better and more refreshing change, than a golfing holiday; but it needs to be very carefully managed, for it is one of the easiest to spoil, says Henry Leach in the London Sketch. The man needs to keep a very strong hold on himself, to be very determined; and if he realizes his weakness for the game and his liability to gross excesses, he had better pledge himself to a system and abide by it, even at the cost of considerable discomfort at first.

Excess—that is what ruins most golfing holidays, and makes some men think when they get back home that they would like never to play the game again; and anyhow they declare they will not play it for six weeks. They feel that they will at last get themselves released from that horrible bondage which was indicated in the remark which my friend and opponent, Colonel X, made to me when he had fluffed two easy shots in succession on an east coast links the other day. "Who on earth would play this wretched game if he was not obliged to?" You see, the colonel had been overdoing it. Golf had become a toil to him; but yet he felt bound to it. The best of his keenness had gone, and his eye was tired, so he could not try hard, and could not play his proper game. Thus he became gloomy. He said that he was sure at last that he would never play well again. He talked about the charms of tennis and bowls. Then he sent home for several spare clubs and wrote instructions to his favorite professional to make him two new drivers and send them along by the quickest passenger train. He was very unhappy, and I was sorry for him. It is terrible to see a good four-handicap man playing an 18 game day after day, and sometimes taking 60 to get to the turn.

When he appealed to me, I told him what to do—ordered him not to play at all the next Saturday and Sunday, and when he started again on Monday morning, to devote his whole mind on keeping his body still, his weight on his heels, to swinging slowly back, and to looking hard at the side of the ball. He promised faithfully; but, for all that, he played three rounds on the Saturday, and confessed to me at night that he felt he was going to the dogs.

This is just a typical case, the result of excess. It is very hard for a man who cannot get more than one or two days' golf a week at ordinary times to limit himself when he is on holiday, is housed alongside a first class course, and has nobody but golfers about him; but he should try to do it. "However keen a player may be, however good his condition, and whatever time he may have at his disposal, it will generally be a mistake to golf on more than four days a week as a regular thing. Any more than that will have a tendency to reduce a man's keenness. Players are very apt to overdo it at holiday times. There may be no great harm in a third round once in a way, but it is a very bad thing to make a practise of." That is what James Braid, the five-times open champion says, and he does know. Still, we have to recognize the fact that a golfer on holiday really cannot leave his clubs alone on three days of the week.

Well, then, an ideal system for the week's play, as I would propound it, is to do 11 rounds thus—two rounds on Monday, two on Tuesday, one on Wednesday, three on Thursday, one on Friday, two on Saturday, and to take a whole holiday from the game on Sunday. That is not too much in the circumstances, and the variation is splendid. Then, on the two-round days, the

man should often rest in the morning, play his first round after lunch, and the second after tea. Between half-past four and seven is the best time of the day for golf, and the most difficult to fill up with anything else, and yet it is generally entirely wasted as the result of the two-round-morning-and-afternoon convention.

VERMONT-TUFTS RUN TODAY.

Cross-country teams of Tufts and the University of Vermont meet this afternoon for the first time. The race will be over the Medford course, which is a little over four miles long. The men will start in front of Goddard gymnasium, go through Medford Hillside, down Winthrop street, through the Lawrence estate and a portion of the Middlesex Fells, along the Mystic boulevard to Winthrop street and finish at Goddard gymnasium.

Tufts—Capt. E. M. Towne '11, H. A. Atwater '11, H. R. Phalen '12, F. B. Fairbanks '12, R. W. Atwater '13, C. D. Prescott '14, alternate.

Vermont—E. W. Donahue '11, Horace Roberts '11, F. H. Abbott '13, A. W. Aldrick '12, H. L. Williams '12, F. O. Jones '13, alternate.

MRS. KING HOLDS TITLE.

NEW YORK—Mrs. Bertha May King retained her title of woman pool champion of the world Thursday night by defeating Miss Martha Clearwater 93 to 66, in the final block of their 400-point match. The grand totals were: Mrs. King 400, Miss Clearwater 307.

ELECTRIFICATION IS BOUND TO COME, SAYS PROF. D. C. JACKSON

Electrical Engineer of the
Institute of Technology
Discusses the Plans for
Railroads Entering Boston.

FINDS BIG PROJECT

"Purely sentimental reasons may hold up the electrification plans of the New York, New Haven & Hartford, Boston & Maine and Boston & Albany railroads for some little time," said Prof. Dugald C. Jackson, head of the electrical engineering department at the Massachusetts Institute of Technology and president of the American Institute of Electrical Engineers, in an interview today.

"The plans are exceedingly practical and the time is not far distant when Boston must have such a traction system," he continued. Professor Jackson added, however, that the scheme of electrification now being worked out is of mountainous proportions. "It is a tremendous proposition," said the engineer. "The economic problems themselves are enough to warrant the most exhaustive examination before attempting to consider such a step."

"To my mind it seems safe to conclude that no general substitution of electrical for steam traction can be made unless substitution is complete, that is, including passenger and freight operation and yard switching in addition and also in making such substitutions operation should be extended to include the whole length of run or engine distance, in order to avoid the uneconomical subdivision of the present trains run together with the added expenses and delays incident to intermediate engine transfer station."

"Notwithstanding the more favorable conditions at New York, incident to the greater density of traffic and the simpler track system in the region of the New York, New Haven, and the New York Central railroads, the records of the New Haven Company demonstrate under present conditions that the electrical train service not only fails to earn any interest upon a very large amount of capital invested, but it has also increased the cost of operation, and with the best favorable conditions in the vicinity of Boston it is impossible to escape conclusions that fixed charges and operating expenses will be still greater. Whether the public wants greater flexibility of service enough to meet an extra increase in rates still remains to be seen."

"Notwithstanding all these adverse criticisms the electrification plan now before the public has many advantages. It is bound to come but at this stage it is hard to tell in just what channels it is best to push it forward."

"There is the Boston Elevated railroad," continued Professor Jackson, "which must be figured in this new move. The Boston & Albany railroad would, when its electrification was complete, draw an enormous amount of traffic from the 'L' which might bring about economical conditions the consequences of which are not easy to forecast. To some it may seem that there will be a financial upheaval and readjustment from the result of this electrification plan."

"To be sure there are many great advantages in this electrification if it should be extended on all the lines entering Boston. Among them are cleanliness, ventilation, lighting, heating, safety and reliability."

RESCUE BOATS ON ATLANTIC COAST

WASHINGTON—The entire Atlantic coast from Florida to Maine is to be patrolled this winter by government cutters, which can hurry to the aid of vessels. There are 10 cutters at the disposal of the government for this patrol work, which has never been attempted before.

Last year the cutters, although not patrolling the coast, went to the rescue of 156 vessels in response to wireless or other summons. These 156 vessels were valued at more than \$10,000,000. The cutters will take up the patrol work on Dec. 1 and will continue it until late in April.

N. Y. C. ORDERS 1000 CARS.

RUFFALO—The New York Central has ordered 1000 cars for fast freight service from the Merchants Dispatch Company. A large percentage of these cars will be of the refrigerator type.

PACKERS MAINTAIN THAT DROP IN MEAT PRICES IS GENUINE

CHICAGO—Packers here insist that the fall in meats is genuine and not a manipulated affair. Dr. Wiley is not alone in the belief that there is manipulation. Retail butchers here, in order to keep up prices, make the same charges.

"If we can be assured by the packers at any time, not in newspaper interviews, but in signed contracts, that they will reduce the price of meats a certain amount and keep them reduced for a period of, say three months, we will be glad to make a corresponding reduction to our customers."

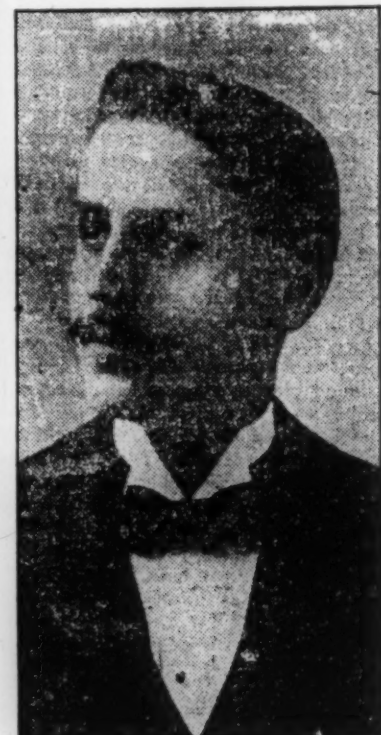

The prices shown are as follows:
No. 1 choice loins and ribs—Sept. 19, 19 cents; Oct. 19, 17½ cents; Nov. 17, 15 cents.

No. 2 loins and ribs—Sept. 19, 16 cents; Oct. 19, 15 cents; Nov. 17, 14 cents.

Pork loins and ribs—Sept. 17, 16½ cents; Oct. 17, 16½ cents; Nov. 17, 13½ cents.

The table shows a decrease of 4 cents a pound in No. 1 beef within two months and a decrease of a little more than 3 cents a pound in pork loins.

Reading Room Experiment in Dorchester Said to Be Meeting With Success

G. A. YUNKER.

G. A. Yunker, 19 Speedwell street, Dorchester, superintendent of the reading room recently opened under the auspices of the Dorchester Coffee House Association at 1349 Dorchester avenue, reports that the experiment is meeting with gratifying success.

The main object is to provide a counter attraction for workingmen and youths to the many saloons in the neighborhood. A piano has been installed and indoor games, also a liberal supply of newspapers, magazines and other reading matter, are available. Light refreshments can be obtained. During the fall and winter months a series of lectures will be given by prominent business men.

The room is open every week day from 7 to 11:15 p. m. The enterprise is supported by religious bodies of all denominations in Dorchester, but there is no intent that the reading room shall be conducted as a mission.

The officers of the organization are: President, Charles F. Gettemy; vice-president, Charles Logue; secretary, G. A. McInnes; treasurer, E. H. Sharp. A board of directors has also been appointed.

News in Brief Gathered Today from Towns and Cities in Massachusetts

EASTON.

Bristol Baseball Club will give an entertainment Thanksgiving eve at Kelley's hall. There will be a large party from Brockton and other neighboring towns. A banquet will be served and there will be selections by an orchestra composed of Hobart Anderson, Frank Dahlborg, Charles Johnson and Joseph Anderson. Readings, games and quartet selections have been arranged.

The foundation for the new residence for Miss Mary S. Ames has been completed and the contract for the house awarded to Gascoigne & Shattuck of Boston.

Senior class of the high school will hold a reception in Memorial hall, North Easton, this evening.

Union Thanksgiving services will be held in the Church of the Unity on Thanksgiving day and the Rev. W. L. Chaffin, pastor emeritus, will give an address.

CHELSEA.

Building permits have been granted to Robert Finkelstein for three brick stores at 98 Arlington, to cost \$3500; Ros Thelso, three-story five-family brick dwelling, Third and Arlington streets, \$10,000; Wallek and Dizek, two three-family dwellings, 46-48 Cottage street, \$10,000; A. Levine, three-family dwelling, 164 Chestnut street, \$4500; Charles A. West, three-family brick dwelling, Shurtzoff street, \$11,000; A. and J. Maltzman, three three-family frame dwellings, 101-103 Poplar street, \$12,000; Antonio Frorillo, two three-family dwellings, 33-35 Summer street, \$11,000; Louis Jacobs, two three-family brick dwellings, 80-88 Walnut street, \$18,000; Edward Uminsky, three-family dwelling, 164 Poplar street, \$4000; Philip Glazier, two three-family brick dwellings, 165-169 Poplar street, \$8000, and Weinstein & Himmelberg, three-story, six-family dwelling, Chestnut and Fifth streets, \$12,000.

NEWTON.

The football between Newton high school and Boston College preparatory teams has been postponed until Saturday afternoon when it will be played on Clifton field, Newtonville.

The fair opened in the Church of the Messiah at Auburndale by the women of the congregation will be continued this afternoon and evening. The choir is in charge of the candy table, with Miss Elizabeth Melcher as chairman and the Lawrence club, under the direction of Reginald D. Lidstone is in charge of the men's table. Others in charge of tables are Mrs. F. T. Barnes, Miss Washburn, Mrs. W. W. Heckman and Mrs. Maurice Beardsley.

Palestine chapter, O. E. S., will hold a concert this evening in Temple hall, Newtonville.

WATERTOWN.

Isaac B. Patten Relief Corps, No. 59, will observe its silver anniversary Nov. 30 in Masonic hall.

The high school football team will play the Alumni Thanksgiving morning. The Alumni team includes such players as Messrs. Kelly and Henry Cooney, stars.

Work on the new high school has been started and the cellar is nearly completed.

Work on the continuation of Charles river road has just been completed. On the whole the result is a great improvement. The river has been dredged and a rocky bank has been sloped with loam and grass planted. This makes a macadamized road from Watertown square to the arsenal.

BROCKTON.

The total registration for the municipal election is 11,130, the largest it has ever been.

Henry J. Shaw of West Bridgewater begins his duties as assistant physical director of the Y. M. C. A. gymnasium today.

Harrison lodge, I. O. G. T. will observe its 21st anniversary this evening with a dramatic entertainment.

Dr. George W. Tupper of Boston will address the Lijuanian Educational Society Wednesday evening on "Teaching Elementary English to Foreigners." He will also address a gathering of business men in the Y. M. C. A. building on the same evening.

COCHESSETT.

The Brotherhood of the Methodist church has appointed L. M. Fairbanks, H. A. Lothrop and G. R. Penpraise to arrange for an entertainment early in December.

Ladies Aid Society of the Methodist church closed a two nights' fair at the church vestry Thursday evening. The tables were in charge of Mrs. L. M. Fairbanks, Mrs. Herbert Fish, Mrs. Frank H. Jones, Miss Hattie Jennings, Miss Cora Alger, Miss Gladys Holbrook, Miss Eunice Logue and Miss Florence Lothrop.

Young Men's Club will hold a series of parties this winter in the local engine house hall.

MIDDLEBORO.

The Cabot Club of this town will meet Dec. 1. Miss Arnold, president of Simmons College, will speak on "The Test of a Liberal Education."

The Athletic Association basketball team will go to Bridgewater Saturday evening to play the Normal school team. Middleboro second team will play Normal school seconds.

The annual sale and supper by Y. M. C. A. Ladies Auxiliary will be held this evening.

Middleboro high football team will play Kingston high at Kingston Saturday afternoon.

ROCKLAND.

Woman's Club meets in the assembly hall of the high school this afternoon. Former Gov. Curtis Guild, Jr., of Boston will speak. Miss Blanche C. Maguire will be soloist.

Mrs. Mary A. Beal of Harttuff W. R. C. will inspect General Sylvanus corps of Braintree Monday evening.

The class of 1911 of the high school has appointed a committee consisting of Angeline Spence, May Bellamy, Daniel Wheeler, Joseph Dunn and Arthur Chubbuck to arrange for the annual class play.

Association day will be observed in all the churches Sunday morning, and Y. M. C. A. representatives will speak as follows: Andrew Case, Lynn, in the Congregational church; Assistant Secretary Henry Maxwell, Somerville, in the Baptist; Lester Clee, Quincy, in the Methodist Episcopal; and Secretary R. C. Snow, Rockland, in the Unitarian.

Mothers Mutual Improvement Society will meet with Mrs. J. L. Burrell, South Union street, Tuesday afternoon.

WINTHROP.

Somerset Club will be entertained this evening at the home of Murray Crane.

Miss Sarah L. Ball was chairman of the committee of St. Johns Guild which gave a successful fair in Baxter's block Thursday evening. She was assisted by Mrs. Westford M. Taylor, Mrs. Herbert Baxter, Mrs. Charles W. Henry, Mrs. Walter P. Symonds, Mrs. Harry Jones and Mrs. Lythcoe.

Mrs. Edwin H. Leonard, president of the Equal Suffrage League, will entertain members at her home on Shore Drive, Nov. 25. Members of the Quest and Question Club will also be guests.

Winthrop Royal Arch chapter will hold a special meeting Monday to work degrees. On Nov. 22 it will have its annual meeting, election and installation of officers.

MEDFORD.

The sewer and water commission will make a reduction in the water rates on Jan. 1 owing to the increased water income since meters have been installed. The rate has already been made but will not be given out until after the aldermen have passed upon it.

Arthur Julian is one of the amateur gardeners who is now raising roses out of doors by sprinkling the bushes with cold water. At his garden on Golden avenue he picked three large red roses this morning.

Roswell B. Lawrence has taken out nomination papers as a candidate-at-large for reelection to the school committee at city election Dec. 13. Mayor Clifford M. Brewer is being considered as a candidate for the school board.

WAKEFIELD.

Miss Sarah E. Wilkins desires to remain in the eighth grade, Lincoln school, and the school committee will elect another successor to Miss Eleanor F. Emerson as principal of the Hurd school.

George Kiernan of Philadelphia will read Joseph Jefferson's "Rip Van Winkle" at the high school Saturday evening, in aid of W. H. S. Athletic Association.

A Thanksgiving eve social party will be given in the Bear Hill Golf Club house Wednesday evening.

William E. Pittcock has resigned from the board of auditors.

Walter Wolfe '13 is quartermaster sergeant of the high school battalion.

EVERETT.

Mayor Bruce has forwarded to the fire commission a recommendation for the appointment of three additional regular members to the department to fill out the full quota.

Wendell Phillips council, Golden Cross, received an official visitation Thursday evening from Grand Commander Binn and Deputy Rawlskohn. Delegations were present from Medford, Boston, Alpha of Boston and Bloomfield lodge of Dorchester.

At the next meeting of the board of aldermen, the appointment of Thornton A. Smith for city auditor as made by Mayor Bruce will come up for final action.

ARLINGTON.

This evening Grand Prolate W. Henry Lunnih will attend the meeting of Mount Carmel commandery, Knights of Malta, in Middleboro.

Henry F. Hobbs of Cambridge has purchased 5000 square feet of land on the southerly side of Windsor street, containing 50 feet frontage.

Officers of Arlington Five Cent Savings Bank are: President, William G. Peck; secretary and treasurer, H. Blasdale.

A. O. U. W., Circle lodge 77, will meet this evening in Crescent hall, Arlington Heights.

LEXINGTON.

Old Belfry Club will give a Thanksgiving dance Saturday evening, Nov. 26. Tuesday afternoon the Outlook Club will meet in the Old Belfry Club hall. Mrs. John Colby Abbot will speak.

The street department is macadamizing Bedford street from Elm avenue to Camellia place.

Ladies Social Circle will hold a food sale in Cary hall, Saturday afternoon.

WEYMOUTH.

Ladies Social Circle of Union Congregational church held a sale Thursday afternoon and evening.

Laymen League of Second Universalist church will hold its annual banquet in the vestry Monday evening.

Old Colony Club will meet in Union Congregational church this evening.

REVERE.

Frank P. Morse, principal of the high school, has announced as the members of his advisory board, Dr. Frederick F. Andrews, Dr. William G. Bond, C. F. Chisholm, Daniel F. Shepard, Clarence E. Clisbee, Thomas F. Coughlin, Arthur B. Curtis, John F. Hayes, George A. Mann, Moses Mischel, Patrick J. Murray, Dr. D. A. Nason, Dr. W. C. Newton, Ernest H. Pierce, John C. Pirie, Merton D. Williams.

At the meeting of the Men's Club of the First Congregational church, Nov. 22, addresses will be made by Judge Samuel R. Cutler, Arthur B. Curtis and Clarence E. Clisbee on "Town or City Government for Revere?"

At the town meeting Monday night the citizens will be asked to appropriate \$1000 for sidewalks and \$500 for granite stones on Revere street, \$500 for granite sidewalks around the Congregational church; also to accept as highways Everett street, parts of Calumet and Waban streets, Elmwood, Thorndike, Warren streets and Kingman avenue, and to appropriate money for their construction.

MALDEN.

Grammar school principals Thursday took over control of the school athletics on the same basis as those of the high school. The new reading courses were adopted and will be submitted to the school committee for final approval.

At the competition drill of the Malden Rifles Thursday night, medals were given to Capt. Harry C. Bacon, for 14 years service; Quartermaster Spraker, for 19 years, and Sergt. Thomas E. Tracy for nine years.

Work on the new Linden sewer in Lawrence and Beach streets is being pushed to completion and the Saugus and Cliftondale cars are now running through the streets again.

QUINCY.

Wollaston Unitarian, Methodist Episcopal, Baptist, Congregational and St. Chrysostom churches, will hold a union service on Thanksgiving afternoon. The Rev. Wesley Wiggins of the Methodist church will preach.

Citizens No-License League has elected: President, George A. Sidelinger; vice-president, William F. Cummings; secretary, Joseph A. Sedgwick; treasurer, John F. Hunt.

The Parent-Teachers Association of Wollaston school met Thursday afternoon. Mrs. Richard C. Cabot of Boston gave an address.

MELROSE.

For excellent service Police Chief Kerr has granted to Patrolman Louis B. Heaton extra vacation this month.

Registration for the city election will commence tonight. The city election will be held Dec. 13.

Dexter G. Pratt of Franklin street has announced his candidacy for the board of aldermen from ward 2. Aldermen Joshua T. Nowell and Frederick W. Calkins will also seek reelection.

READING.

A stereopticon lecture "A Flying Trip Through Europe," will be given in the Congregational church guild hall this evening under the auspices of Howard W. Poor's Sunday school class.

Municipal lighting plant's extension of electric service to North Reading will be completed about Jan. 1. A new line by way of Main, Ash and Haverhill streets will also be installed.

Veteran corps will hold a fair Dec. 21-22.

IPSWICH.

The Oliver Smith farm on County road, one of the most desirable places of its kind in town, is reported to be in process of transfer to a new owner.

WHY SENATOR CALLS FOR CONGRESSIONAL PARTY CONFERENCE

(Continued from Page One.)

of Congress to submit a report covering any of the schedules. It will, however, be able to make such reports, perhaps for both wool and cotton, at the beginning of the Sixty-second Congress, in December of 1911, when the Democrats will come into control of the House.

What will the Democrats do with such reports? Will it act on them, and thus secure a start in the work of downward revision? or will it hold out and accomplish nothing?

This is one question for the proposed Democratic national convention to pass upon. To pass a general revision bill would be to comply with the Denver platform; to take up individual schedules would be to follow the lead of the Republicans.

A Democratic House in making a tariff bill will have to consider carefully the language of the Denver platform declaring that "articles entering into competition with trust-controlled products should be placed on the free list, and material reductions should be made upon articles competing with such American manufactures as are sold abroad more cheaply than at home."

Will this declaration be construed liberally or narrowly? Here is another question for the proposed Democratic national conference. The Democrats, feeling sure of victory in 1912, will be compelled to approach this question with the utmost caution.

Counting Republican insurgents in the Senate, there will be enough votes in that body to put through an income tax bill. Will the House pass such a bill? The answer to that question will be awaited with interest, in view of the rejection of the income tax amendment to the constitution by several of the southern states, and its hard battle in others.

The Democrats proposed some drastic plans at Denver with regard to trust regulation, and they also declared in favor of the national guarantee of bank deposits. What will be done with these two questions?

The Republicans, it is understood, will place no obstacles in the way of the Democrats in the next Congress in the question of carrying out their promises of economies in administration, but they believe the Democrats will have their hands full in cutting down expenditures. This pledge of the Democratic party will perhaps be hardest of all to fulfill.

These are a few of the questions which the Democrats must face in Congress next year, and for which Senator Raynor wants the Democratic national conference held next month.

EARLY SHOPPING AIDS SELECTION

"A much better selection can always be made if holiday shopping is done early, as a general thing," said R. C. Kingsley, treasurer of the John H. Pray & Sons Company today.

"As a rule people buy small things for gifts during the holidays and a very much better selection can be made before the holiday rush has set in and the most desirable goods have been exhausted. It must be confessed that it does not make so much difference to us as the carpet business is rather different from others in this respect, but in general any movement to encourage early shopping is most commendable."

KEITH SHOE CO. TO GET PLANT SHOP IS REPORT

Shoe manufacturers of New England are interested in the report today that the George E. Keith Shoe Company, the largest manufactory in Brockton, is to take over the Thomas G. Plant shoe manufacturing plant at Jamaica Plain.

The lines of women's shoes recently discontinued by the Plant company, following the sale by Mr. Plant of certain machinery making processes to the United Shoe Machinery Company, was not denied by Mr. Keith.

"I prefer to have no statement coming from me," he said.

"Although it is impossible for me to say what Mr. Keith is thinking," said Mr. Radcliffe, treasurer of the Thomas G. Plant Company, "I can say that we have heard nothing of any such arrangement in this office."

JOHNSTONE'S FATAL FALL.

DENVER—Ralph Johnstone, the aviator, holder of the world's altitude record dropped Thursday in his flying machine from a height of 500 feet into the inclosure at Overland park aviation field and was killed.

Ralph Johnstone was a native of Kansas City, Mo. He was a trick cyclist before he became an aviator and was famed for his feats on the wheel. He traveled extensively abroad, giving exhibitions on the bicycle. Six months ago, through Roy Knabenshue, he obtained an engagement with the Wright brothers. They liked his work and a few weeks ago he signed a contract extending until Jan. 1, 1912.

His specialty was altitude flights and the crowning triumph came to him on Oct. 31, when he broke Wynnmalen's world's altitude record of 9180 feet by soaring to a height of 9714 feet. At the Atlantic meet he won many events of a record-breaking character.

session, and because of their regular committee work, will have little time to give personally to the currency report.

In the meantime a force of experts is gathering detailed information on monetary conditions throughout the world for the use of the commission.

The members of Congress appointed on the monetary commission are: Nelson W. Aldrich of Rhode Island, chairman; Edward B. Tamm of New York, vice-chairman; Julius C. Burrows of Michigan; Eugene Hale of Maine; Philander C. Knox of Pennsylvania; Theodore E. Burton of Ohio; John W. Daniel of Virginia; Henry M. Teller of Colorado; Hernando D. Money of Mississippi; Joseph W. Bailey of Texas; Jesse Overstreet of Indiana; John W. Weeks of Massachusetts; Robert W. Bonyon of Colorado; Sylvester C. Smith of California; Lemuel P. Padgett of Tennessee; George F. Burgess of Texas; Arthur P. Pujol of Louisiana; Arthur B. Shelton, secretary; A. Piatt Andrew, special assistant.

Mr. Mitchell Gains

The recount of the vote for congressional candidates in the fourth district makes it appear at present that John J. Mitchell of Marlboro, the Democratic nominee, will win the election for the short term of the sixty-first Congress, but William H. Wilder of Gardner, the Republican candidate against Mr. Mitchell, appears assured of victory in the regular election to the sixty-second Congress.

A recount will be made of the vote in wards 6 and 7 of Waltham tonight. Monday the vote in Weston will be recounted.

As a result of the recount in wards 1 to 5 in Waltham and in the towns of Lincoln, Wayland and Marlboro Thursday night, Mr. Mitchell made a net gain of 17 votes in the special election for the short term and 20 votes in the regular election for the sixty-second Congress.

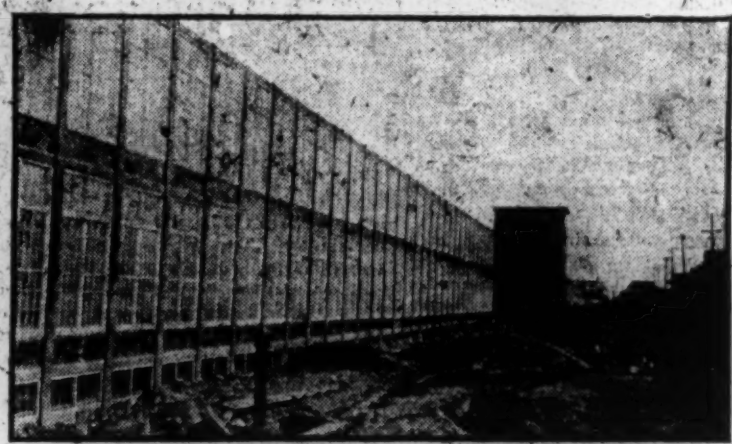

Harris Lead Cut Down

Judge Robert O. Harris of East Bridgewater, the Republican candidate for Congress in the fourteenth district, now leads his opponent, Thomas C. Thacher of Yarmouth, by but 89 votes on the recount of the vote cast for the congressional candidates in this district at the state election.

The vote is yet to be recounted in the city of Brockton and in the towns of Carver, Halifax, Marshfield, Mashpee, Plympton and Scituate.

Judge Harris was declared elected on

NEW MAVERICK COTTON MILLS IN EAST BOSTON COMMENCE TO OPERATE ON SMALL SCALE

SECTION OF NEW COTTON MILLS ON CHELSEA CREEK.

Weaving cotton cloth at one of the buildings of the new Maverick mills in East Boston has begun, and the prediction of Governor-elect Foss, chief promoter of this enterprise, that the mills would be running before the first of next year is fulfilled.

What is completed is only a section of what is planned by the owners. Their plans call for a group of buildings, and these will be erected as soon as possible and connected with the original mill.

The mill which has just been opened employs more than 100 operatives, and this number will probably be doubled when this part of the plant is in full operation. The building is 901 feet in length and about 150 feet wide. It is only two stories in height and is fireproof and sanitary. As it now stands it is only half as high as when completed, for two additional stories are to

be put on it and this work is already begun.

The mill completed will give employment to 1200 hands and when the entire group is finished there will be required more than 5000 employees.

In equipment it is claimed the new mills surpass any cotton mills in the country. The mill power is to be furnished to the machinery by groups of electric motors distributed throughout the plant, and deriving their power from a central station, where a 2000-horse power turbine engine will generate the current. There are already 60,000 spindles in the mill, and 2200 looms in the weaving shed.

The foundations of several of the other buildings are already in, but it will be several months before machinery can be installed and the complete group put in operation.

George G. Cotton pointed out that his company is engaged in the manufacture of chemicals, and special training for that particular work was necessary. The plan adopted by this company is known as the "half-time plan," according to which the boys work one week in the shop and one week in the school.

G. M. Basford, in summing up insisted that apprenticeship offers the only method for thoroughly preparing recruits for mechanical work in what are known as the trades.

Samuel F. Hubbard, superintendent of the North End Union spoke on "Apprenticeship and the Employer's Responsibility."

He said in part:

"In saying that the employers must have charge of the trade school it must not be inferred that the professional educator is to be excluded. What service he can render through the introduction of approved educational methods into the trade schools should be invited. When it comes, however, to the administration of the trade school, the employer must be most in evidence."

The general discussion that followed was participated in by Henry Abrahamson, secretary of the Boston Central Labor Union; Walter B. Russell, director of the Franklin Union, and Winthrop Talbot, M. D., of the National Electric Lamp Association.

At 8 p. m.—Chairman Frederick P. Fish, chairman state board of education, Boston, Mass. "Continuation Schools of Germany." Dr. George Kerschensteiner, superintendent of schools, Munich, Bavaria.

About 400 leading educators of the country sat down at the banquet Thursday evening at the Hotel Somerset, which was given jointly by the national society and the Boston Chamber of Commerce.

The speakers were Lieut. Gov. Louis A. Frothingham, Mayor Fitzgerald, Gov.-elect Eugene N. Foss, Bernard J. Rothwell, president of the Chamber of Commerce; Frederick A. Delano of Chicago, president of the Wabash railroad; Frederick P. Fish, chairman of the state board of education; Charles A. Winslow, representing the American Federation of Labor, and Dr. Charles R. Richards, president of the society for whom the banquet was given.

At the termination of the speaking Toastmaster Guild delivered a short complimentary address in German to Dr. George Kerschensteiner, superin-

BOSTONIANS SAIL FOR THE TROPICS

Another large list of saloon passengers sailed for the tropics and Central America today on the United Fruit Company's steamer Limon, Captain Smith, among them being A. J. Martin, Mr. and Mrs. A. Curotte, Miss Beatrice Curotte, Alberto Orozco, M. Purdy and J. Onderdonk, of Boston, Mrs. William Keith, Mrs. F. C. Tucker and Mrs. M. Bond, of New York.

The Limon carried out a lot of railroad material, 250 barrels of cement and considerable general merchandise.

Among the passengers on the United Fruit Company's steamer Almirante, which is on the way from New York to Kingston, Colon and Santa Marta, are many Bostonians. The names on the passenger list include those of M. V. Couch, W. W. Partridge, Mr. and Mrs. J. A. Cameron, Mr. and Mrs. R. W. Stevens, Miss A. K. Swan, W. D. Brooks, Dr. J. S. Green, A. V. Severn and W. W. Dutton of Boston.

TUNNEL FOR WEST VIRGINIA.

BUFFALO—One of the big improvements contemplated by the Norfolk and Western, a subsidiary of the Pennsylvania, in connection with the double tracking and relocation of its line, is the building of a long tunnel near Coopers, W. Va., at the summit of the Alleghenies.

to Senator Tinkham's statement he spent \$50 in the election, and according to a statement of the ward 18 committee they spent \$315, of which \$100 was donated by W. Dudley Cotton, and the remainder by the Republican city committee.

BOSTON CONVENTION TAKES UP PART-TIME AND NIGHT SCHOOLS

(Continued from Page One.)

field, or household conditions, or wherever it is that men learn to do effective work.

"The most formidable objection to part-time or vocational training for young people is the fear of their exploitation."

"It is for this reason that for young workers under the age of 17 or 18 it may prove desirable for the educational authorities rather than the employing to take the lead in guiding the program of training. The time has arrived for a candid examination of the whole question."

"A school for salesgirls over 16 years of age is soon to be opened in Cincinnati, and certain firms have agreed to send at least 200 girls there, under the same conditions as those of the boys who now attend," said Frank B. Dyer, superintendent of schools in Cincinnati.

Apprenticeship and corporation schools which are in operation in some of the great railway systems and other corporations were described in detail this morning.

A large audience was present. Tracy Lyon of the Westinghouse Electric & Manufacturing Company, Pittsburg; F. W. Thomas, supervisor of apprentices of the Atchison, Topeka & Santa Fe railway system; Samuel F. Hubbard, superintendent of North End Union, Boston, and George G. Cotton of the Solway Process Company, Syracuse, discussed the apprenticeship schools of their respective companies.

G. M. Basford, assistant to the president of the American Locomotive Company, New York, closed the session with a summary and analysis of the papers read.

"Chronologically apprenticeship was the first step in trade training and it can be traced back into the middle ages," said Magnus W. Alexander of the General Electric Company of Lynn. Under later conditions, however, he said the trained apprentice became of secondary consideration. The fallacy of this attitude toward apprenticeship became apparent, however, and the last decade has seen a rejuvenation of the theory of trade training. Since then the movement has gained steadily.

Tracy Lyon said that his company had a very keen appreciation of the importance of industrial education. It gave its apprentices a certain amount of class room instruction during working hours, and also supported in part the Casno technical night school, besides providing instructors who supervise the shop work of the apprentices with the end in view of informing them in regard to all parts of the processes of the shop.

F. W. Thomas said that the apprenticeship system of the Santa Fe Railway system had its origin when the road was in crying need of skilled mechanics and was originated for the definite purpose of providing mechanics, as they could not be hired. The same need is felt at present. The company can hire all the mechanical engineers, draftsmen and college men that are wanted, but the greatest lack, not only of the Santa Fe Railway system but of railroads and manufacturing plants all over the country is first-class skilled mechanics.

George G. Cotton pointed out that his company is engaged in the manufacture of chemicals, and special training for that particular work was necessary. The plan adopted by this company is known as the "half-time plan," according to which the boys work one week in the shop and one week in the school.

G. M. Basford, in summing up insisted that apprenticeship offers the only method for thoroughly preparing recruits for mechanical work in what are known as the trades.

Samuel F. Hubbard, superintendent of the North End Union spoke on "Apprenticeship and the Employer's Responsibility."

He said in part:

"In saying that the employers must have charge of the trade school it must not be inferred that the professional educator is to be excluded. What service he can render through the introduction of approved educational methods into the trade schools should be invited. When it comes, however, to the administration of the trade school, the employer must be most in evidence."

The general discussion that followed was participated in by Henry Abrahamson, secretary of the Boston Central Labor Union; Walter B. Russell, director of the Franklin Union, and Winthrop Talbot, M. D., of the National Electric Lamp Association.

At 8 p. m.—Chairman Frederick P. Fish, chairman state board of education, Boston, Mass. "Continuation Schools of Germany." Dr. George Kerschensteiner, superintendent of schools, Munich, Bavaria.

About 400 leading educators of the country sat down at the banquet Thursday evening at the Hotel Somerset, which was given jointly by the national society and the Boston Chamber of Commerce.

The speakers were Lieut. Gov. Louis A. Frothingham, Mayor Fitzgerald, Gov.-elect Eugene N. Foss, Bernard J. Rothwell, president of the Chamber of Commerce; Frederick A. Richards, president of the society for whom the banquet was given.

At the termination of the speaking Toastmaster Guild delivered a short complimentary address in German to Dr. George Kerschensteiner, superin-

GIRLS' CITY FORMED AMONG THE PUPILS OF BOWDOIN SCHOOL

The first steps for the formation of a city to be officered wholly by little girls, and all of whose residents shall be little girls, were taken today at the Bowdoin school. It is an extension of the school city idea which is now holding the attention of Boston educators and is started with the view of giving it a practical and thorough test.

Alonso Meserve, master of the school, is chairman of a committee of six headmasters and one assistant superintendent of schools today appointed by Superintendent Brooks to investigate the subject and report to the school committee on the advisability of making the school city a regular feature of the Boston school system. To do this most effectively he decided to organize a city in his own school where he can watch its operations minutely.

Wilson L. Gill, founder of the movement, conducted proceedings which began with a meeting of the eighth grade. A constitution was presented and adopted and temporary officers appointed. It is the duty of these officers to enter at once upon the general government of their "city" and conduct arrangements for the nomination and election of permanent officers which will be held in the near future. It is confidently expected that this republic of little girls will be conducted as efficiently and prove as harmonious and successful as it is unique.

BOSTON PROVIDES FOOD FOR FLEET

The provisions which the United States navy supply ship Celtic will take to the West Indies early in January to provision the Atlantic fleet upon its return from the present European cruise were purchased in Boston Thursday. In recent years most of the provisions for the supply ships have been bought and delivered in New York.

The purchases aggregated 1,109,700 pounds. The lots will be delivered and placed in the cold storage apartments of the Celtic at the Charlestown navy yard on or before Dec. 26. The ship will sail Jan. 8 for Guantanamo, so as to be there upon the arrival of the fleet to replenish the fresh meat and other stores of the various battleships.

EXPECT NO STRIKE IN PANAMA ZONE

ST. LOUIS—"I don't think there will be a strike in Panama," says President J. A. Franklin of the International Boilermakers' Union, who is attending the American Federation of Labor convention here. "Mr. Franklin states, however, that if demands of the boiler-makers engaged in the Panama Canal Zone are refused by the government and those workmen who quit Thursday effect a general strike, the canal vacancies will not be refilled by mechanics from the United States."

GRANGE FORMED AT WAKEFIELD

WAKEFIELD, Mass.—Wakefield grange, a branch of the Patrons of Husbandry, was organized in Grand Army hall last night by state grange deputy William P. Herrick.

The following officers were elected: Master, Robert C. Atkinson; overseer, Edwin C. Miller; lecturer, Darius Hadley; steward, L. E. Carter; assistant steward, G. B. Herrick; chaplain, E. H. Perley; secretary, Mrs. E. C. Miller; treasurer, A. W. Brownell; ceras, Mrs. Robert C. Atkinson; pomona, Mrs. G. B. Herrick.

COMMERCIAL CLUB DINES.

The semi-annual dinner of the Commercial club of the Boston Consolidated Gas Company was held at the Revere house last evening, about 50 members of the club being present. President C. J. Cornell presided.

EXPERT LECTURES ON GEMS.

Before the Boston Society of Arts and Crafts last evening at the Twentieth Century Club George Frederick Kunz, author and gem expert, officer of the Legion of Honor of France and Knight of St. Olaf of Norway, lectured on gems.

GIVES ADVERTISING TALK.

At a meeting Thursday evening of the Pilgrim Publicity Association at the City Club, Ben S. Jacobs, advertising manager for Conrad & Co., and a director of the association, talked on "Advertising."

COAL FOR NAVY YARD.

Loaded with a cargo of coal, the collier Ajax arrived at the Charlestown navy yard today from Hampton Roads, Va.

tendent of schools of Munich, Bavaria, who was a guest at the dinner.

At the head table were seated, in addition to those already mentioned, William E. Huntington, president of Boston University; Prof. Paul H. Hanus of Harvard; Dr. H. M. Leipziger of the New York board of education; Herman A. Metz, former controller of the city of New York; James P. Munroe, representing Boston-1915; A. Lincoln Filene and Henry Lafavour, president of Simmons College.

The first speaker was Lieutenant-Governor Frothingham, who assured Governor-elect Foss that he would be with him during his administration in everything that the latter sought to do for the good of the commonwealth.

SALEM IN DOUBT AS TO REALIZATION OF RAILROAD PLAN

SALEM, Mass.—Salem people are today discussing the proposition of President Mellen of the Boston & Maine and New York, New Haven & Hartford roads to take over the property of the Boston, Revere Beach & Lynn railroad, and electricity and extend it through Salem to Beverly, and ultimately to Gloucester.

Mayor Arthur Howard said: "I think the Boston & Maine ought to make its other promises good before seeking permission to engage in new enterprises."

Former Mayor John F. Hurley says that there is something in the scheme of the Boston & Maine road which has not come to light yet. "If I am not mistaken," said Mr. Hurley, "the Boston & Maine already owns the Boston, Revere Beach & Lynn railroad or control the stock in it which is the same thing. If Mr. Mellen and his associates have the money to spend the best thing they can do is to electrify the Boston & Maine as far as Salem and eliminate the smoke and cinder nuisance."

Col. John E. Spenser of the Second Corps Cadets: "The announcement is a clever scheme to hold up the Boston & Eastern franchise."

Harry P. Gifford, president of the Salem board of aldermen: "It is a bluff to keep out the Boston & Eastern."

RAILROAD SHIFTS SAID TO BE DUE

Charles M. Burt, general passenger agent of the Boston & Maine railroad, is likely to use made manager of the passenger traffic of both the Boston & Maine and the New York, New Haven & Hartford railroads, according to a report in railroad circles.

It is said that A. B. Smith, the present general agent of the New Haven road at New Haven, will be made general ticket agent and that F. C. Coley, the assistant general passenger agent at New Haven will succeed Mr. Smith under Mr. Burt.

Mr. Burt, when asked today about the reported change, said that it was the first intimation he had received of anything of the kind. Mr. Coley, it is said, is on a vacation in Europe.

SAYS PROHIBITION SENTIMENT GROWS

COLUMBUS, O.—Perley A. Baker, national superintendent of the Anti-Saloon League, who is presiding at a conference of 80 anti-saloon leaders of the country at Westerville, in reply to the statement regarding the election results made yesterday by the National Brewers Association headquarters in New York, said:

"Prohibition is not on the wane anywhere in this country. It is on the increase in every state. We are going to press for larger local option units in every Legislature."

COLLISION AT NORTHBORO.

NORTHBORO, Mass.—As a result of a head-on collision between two cars of the Worcester Consolidated Street railway at French curve Thursday afternoon, James H. Mansfield of Marlboro, motorman of the west-bound car, received injuries from which he passed on a short time afterward.

TEXAS GOVERNOR REPORTS QUIET ON MEXICAN BORDER

WASHINGTON—Everything is quiet along the Mexican border, and the Texas authorities are taking measures to obviate any possibility of clashes between citizens of Mexico and the United States, according to a telegram received Thursday by the state department from Governor Campbell of Texas.

Governor Campbell said he had no news of trouble in Uvalde, where a disturbance between Americans and Mexicans was reported.

SAN ANTONIO, Tex.—Federal secret service officers who have been working here for the past several months have just learned many details of the revolutionary plot of part uncovered by the Mexican government.

A general rising along the border, from Nogales, Ari., to Brownsville, Tex., was set for Sunday, Nov. 20.

EAGLE PASS, Tex.—Consul F. De P. Villarsa of Mexico Thursday forwarded to his government a voluminous document containing the result of his investigations of the Rodriguez affair.

LAREDO, Tex.—That the Mexican government is moving swiftly to crush any rebellion that may be brewing in the republic was shown when General Villar, commanding the frontier department of the Mexican army, arrived in Nueva Laredo today with his staff and officially announced that his headquarters will be changed from Matamoros to Nueva Laredo.

ALGONQUIN CLUB ELECTS OFFICERS

The annual meeting of the Algonquin Club was held Thursday evening at the clubhouse. Reports showed the past year had been the most prosperous in the club's history. These officers were elected:

President, Gen. Charles H. Taylor; vice-presidents, Nathaniel Thayer, Washington R. Thomas, John Mason Little, Nehemiah W. Rice, Lucius Tuttle, Josiah H. Benton; treasurer, David Loring; secretary, George E. Carter.

FOUNDING NEW PLAY UPON 'ABSOLUTISM' FOR UNITED STATES

John De Kay, Author of
"Judas," Declares That He
Is Writing Another Drama
on Passing of a Republic.

"ADVANCE HISTORY"

LONDON—John D. De Kay, author
terest for Americans in Mr. De Kay is
the fact that he is also a business man,
the head of a large Anglo-Mexican com-
pany, a student of modern conditions,
of the new play, "Judas," which Mme.
Bernhardt will produce in New York in
January, will sail next month to at-
tend the final rehearsals.

But, aside from "Judas," the real in-
and is writing another play, as he an-
nounces, "dealing with what I consider
a great constitutional question."

"This play," says Mr. De Kay, "that
looks backward, shows how we lost our
liberties. The great question in the
United States is not whether the tariff
be put up 5 per cent or down 10, but
whether or not 90,000,000 persons are
able to maintain a republic."

"The issue is narrowing down to ab-
solutism. The man who is able to force
himself or his nominee upon the people
of the republic will be able to destroy
the republic. It is again emphasized in
my new drama that the republics of
the world have not been destroyed by
the men who set out to destroy them,
but by the men who were determined
to rule them."

"It is not the question whether the
man who seeks to dictate is honest or
dishonest, but rather a question of the
danger involved for republican institu-
tions when the people's machinery for
choosing rulers shall be dominated by
one man."

"The play is intended to show by what
steps a great republic has ceased to be
a republic and the fatal results of the
policy of compromise which, in spite of
all their protests, the people of the
United States have invariably accepted
at the polls."

"In the background is the figure of one
of the greatest men of all time. What
may in the play now appear an impos-
sible fancy may prove to be merely ad-
vance writing of American history. While
the people fight about non-essentials
their republic goes out with the tide."

According to Mr. De Kay, Mme. Bern-
hardt will create the central figure of
this play, which she has promised to
produce in Paris.

ARCHITECTURAL DESIGN IN COURSE

ANN ARBOR, Mich.—The University
of Michigan has this year instituted a
full course in architectural design in
addition to the courses in general archi-
tecture and architectural engineering pre-
viously given. This action marks the
development of a movement for a greater
appreciation of things artistic at the
university, in response to a growing
interest throughout the whole country.

The curriculum of the new course dif-
fers from general architecture and archi-
tectural engineering by a decrease in
the amount of mathematics and engin-
eering required, and an increase in the
amount of architectural design and free-
hand drawing. It differs, too, in starting
students in the architectural work in
their first year, in order to develop an
artistic taste.

What the Students Are Doing

SYRACUSE UNIVERSITY JUNIOR SLATED FOR CARNEGIE MEDAL

Assured by Hero Fund Com-
missioner That He Will Be
Assisted if His Name Is
Acted on Favorably.

SYRACUSE, N. Y.—The Carnegie Hero
Fund Commission will receive the name
of Newton F. Hand, a junior in Syracuse
University, for consideration at the quar-
terly meeting on Feb. 1 as a hero medal
winner.

While at Lake Placid on Aug. 19 Mr.
Hand saw a canoe containing three
women and a man tip over several yards
from shore. Although he is not an ex-
pert swimmer, he plunged into the water
with his clothes on and brought out two
of the women. Then he returned and
rescued the third.

All this the commissioner for this dis-
trict will duly report and he has learned
that Mr. Hand, who is in the Liberal
Arts College, is desirous of continuing
his education if possible. This, the com-
missioner assured him, he will be enabled
to do through the help of the Carnegie
Hero Fund if his name is favorably
passed at the meeting in Pittsburgh.

Mr. Hand is from Orville, N. Y. He is
a member of the Zeta Psi fraternity.
He was catcher on his freshman base-
ball team as well as catcher on the var-
sity team last year and his freshman
year was on the football team. He is a
member of Monks Head, the junior class
society, and is on the committee of ar-
rangements for the junior prom this
month.

NEW HAMPSHIRE TO LOSE VACATION

DURHAM, N. H.—New Hampshire
College faculty has decided not to allow
students a spring vacation, but to extend
a few days the period between the first
and second semesters, Feb. 1-9. This
will also give the agricultural depart-
ment an opportunity to hold the one-
week course for farmers in February,
when they will be better able to attend
than in the spring, when the course was
formerly given.

The sixteenth annual dairy school of
the college will open Jan. 3 and close
March 10. With the new dairy building
completed and equipped, the school this
year offers better opportunities for giving
instruction in dairying than ever before.
Courses are offered along the line of
production, handling and manufacturing
of dairy products. Special attention will
be given to a study of the growing of
crops for and the feeding of dairy cattle,
and the factors influencing the quality
of milk.

ISSUES SIMMONS FALL QUARTERLY

Fall number of Simmons Quarterly,
which gives news of the college and the
alumnus, is now ready for distribution.
Assistant Professor James Holly Han-
ford of the English department is editor.

The Rev. Edward Cummings, minister
of the South Congregational Church,
Boston, addressed the students at the
weekly chapel service Wednesday after-
noon in the Church of the Disciples.

BROWN UNIVERSITY.

PROVIDENCE, R. I.—Cammarian Club
has adopted a rule that only seniors
may sit on the steps of the new John
Hay library. This is a slight extension
of the rule which allows only seniors to
sit on the seat at the Van Winkle gates.

Following are the appointments of the
junior Libers editors: R. B. Andrews, H.
Howland, H. A. Wood, E. S. Barker, S.
P. Marsh, M. H. Pingree, W. H. Robert-
son, R. C. Dexter, H. P. Salisbury, L.
Dennis, F. C. Barrows, Jr., H. P. Jones,
F. C. Perry, D. G. Donovan, L. F. Bur-
roughs, M. M. Purdy, G. B. Wesson, H.
C. White, L. F. Robbins and A. O. Chris-
tianson.

DARTMOUTH COLLEGE.

HANOVER, N. H.—By vote of the
faculty it has been decided to have the
annual spring vacation begin a week
later this year than in previous years,
but lasting two weeks as usual. This
will keep the students in Hanover until
April 6, vacation continuing until April
20.

The Dartmouth Press Club is now be-
ing reorganized and is to be made a
close organization. The college has
given the club the use of a suite of
rooms and has completely furnished them.

WILLIAMS COLLEGE.

WILLIAMSTOWN, Mass.—The new
Williams College dormitory has been be-
gun in the northeast corner of the new
quadrangle adjoining Park street. The
plans call for a building 143 feet long
and 40 feet deep, exclusive of the wing,
which will be built on the Park street
side. The front will face the quadrangle.
The architects are Cram, Goodhue & Per-
guson of Boston, who are also the archi-
tects of Grace hall, the new auditorium.

BOWDOIN ALUMNAE ELECT.

Bowdoin School Alumnae Association
has elected:

President, Mrs. Lue S. Wadsworth;
vice-president, Mrs. Jeanie C. Whittier;
secretary, Mrs. Eudora E. W. Pitcher;
treasurer, Miss Julia G. L. Morse; audi-
tor, Miss Sarah L. Mecuen.

LEATHER GOODS

Ward's
Fancy and unique. See our
new styles. Pocketbooks,
bags, purses, etc.
27 Franklin St., Boston.

VASSAR HOCKEY TEAM IS CHOSEN

POUGHKEEPSIE, N. Y.—Varsity
hockey team is as follows: 1911—Mar-
garet Gamage, Pawling, N. Y.; Helen
Noyes, Milwaukee, Wis.; Theodora
Wheeler, Fairfield, Conn.; Audrey M.
Conklin, Amora, Ill.; Grace Frank,
Brooklyn, N. Y.; Katherine Forbes,
Worcester, Mass.; 1912—Edith C. Brown,
Philadelphia, Pa.; Ruth Cutler, St. Paul,
Minn.; Katherine Brown, Brooklyn, N.
Y.; Dorothy McKee, Lakeville, Conn.,
and Helen Ferris, East Orange, N. J.

Tennis championships have been won
by Mary G. Clark of Buffalo, N. Y. (sin-
gles), Elizabeth Rollins of West Rox-
bury, Mass., and Evelyn Seavey of Kan-
sas City, Mo. (doubles). The winners
are members of the freshman class. They
will receive Vs and also the champion-
ship pins which are to be held for this
year only.

BROWN GLEE CLUB AIDED IN TRAINING

PROVIDENCE, R. I.—Dr. Lacey-
Baker, the new organist at Grace church,
this city, will train the members of Brown
University Glee Club. This is the first
time that the organization has had out-
side help to any great extent in its work
and Dr. Baker has stipulated that the
club furnish some men for the church
choir.

Dr. Baker was organist of Calvary
church, New York city, before coming to
this city. He has had considerable ex-
perience in teaching college musical clubs,
having had that position with Yale,
Pennsylvania and Columbia. He will
give special instruction to the members
of the varsity quartet. Nearly all of
last year's club are in college again this
year.

INSTITUTE WORK FOR RHODE ISLAND

PROVIDENCE, R. I.—Rhode Island In-
stitute of Instruction, now in its sixty-
seventh year, is undertaking several in-
vestigations which are expected to prove
of great benefit to the teachers of the
state. The institute has for several
years held annual conventions at
which all the instructors congregate and
exchange ideas, but this work will be
made even more extensive if plans can
be carried through.

NORWICH CLASS ELECTS OFFICERS

NORTHFIELD, Vt.—Freshman class
of Norwich University has elected: Pres-
ident, Harry L. Putnam of Brattleboro,
Vt.; vice-president, Clinton I. Smallman
of Malden, Mass.; secretary, Leo P. Law-
ton of Middletown, Conn.; treasurer,
Arthur B. Calef of Middletown, Conn.

Thanksgiving recess has been short-
ened by the faculty and extends from the
Wednesday noon before until the Sun-
day night after Thanksgiving day.

AMHERST COLLEGE.

AMHERST, Mass.—Amherst College
Indian relic collection has been largely
increased by a gift of 4000 new speci-
mens. The gift comes from George D.
Pratt, 1893, who has before shown him-
self a friend of the college. The Indian
collection is placed in the Appleton cabi-
net and is one of the most complete of
its kind in existence. Dr. Hitchcock has
been largely instrumental in getting to-
gether the interesting relics. Two years
ago by his efforts the collection was
greatly enlarged. The Pratt addition
consists of 4000 specimens gathered in
the Lake George region by S. D. Paine,
a New York antiquarian. It contains
many implements of bone, stone and
copper.

FASHIONS AND THE HOUSEHOLD

NORFOLK COAT WHAT TO CHOOSE IN HATS

Single-breasted seven-piece garment with applied box plaits.

A SMART looking suit is made by combining Ladies' Home Journal Pattern Nos. 5655 and 5656. The single-breasted seven-piece coat, in Norfolk style, is made with applied box plaits, notched collar, two-piece sleeves with turn-back cuffs, and with applied yoke which may be omitted if desired. The skirt is in seven gores, with two box-plaits on each side of the front, and two box-plaits at the centre-back.

This would be very attractive in a small or hunter's green chiffon broad-sleeved with the collar of black satin, and the cuffs of black patent leather. Invisibly striped serge or cheviot, mixed with a rough mixture would be very desirable, and effective for street or afternoon wear; and for the girl who goes to business, this would make a sensible suit for everyday wear in a diagonal serge.

The coat is cut only in sizes 32, 34, 36, 38, 40 and 42 inches bust measure. Size 32 requires 3 1/2 yards 36-inch, or 3 yards 44-inch material without up and down, or 3 yards 54-inch material without up and down. The skirt pattern is cut only in sizes 22, 24, 26, 28 and 30 inches waist. Size 22 requires 5 yards 36-inch, or 4 yards 44-inch material without up and down, or 3 1/2 yards 54-inch material without up and down.

SUIT MODES

SHORT, straight-cut jackets and narrow skirts are the rule, but there is a great variety in trimming.

The jackets button over at the side, and usually sport a sailor collar. Short-waisted effects are frequent.

Gored or semicircular styles in skirts are given the preference over cluster-pleated models.

Tailored suits are shown largely in rough materials in mannish effects. Serge and cheviot are more seen than broadcloth, except in black.

Broken plaids, invisible checks, herringbone effects, melanges and mat weaves are all receiving their share of attention.

Plain velvet, also hairline stripes, small checks and corduroys, are very much in the mode.

Black and dark colors lead in popularity; fawn's wing and navy blue, seal and golden brown, dark green and gray are all popular.

Black or gray and white mixtures are also good, and some light shades of rose, green and blue are seen.

Holiday Centerpiece

An imposing centerpiece for the Thanksgiving dinner table is made by arranging a mass of shaggy yellow chrysanthemums with a turkey gobbler of paper mache perched high in their midst. From a "hobble garb" of yellow ribbon extend around his legs narrower ribbons extend to each place and are tied to the turkey place cards.

Blue Serge and Fur

Among the street frocks, serviceable blue serge, cut in one piece fashion and closing down one side of the front beneath a narrow band of fur is one of the simplest and neatest to be found. A tiny fur hat and a huge muff make the costume quite complete.

Dressing tastefully at a small expenditure.

THERE is no part of the wardrobe which requires such special thought as the hat one chooses for the various clothes and purposes. A lovely and becoming gown may be ruined by the hat if it is not a style in keeping with the character of the dress. It seems almost superfluous to say that a large picture hat should not be worn with a severely plain tailored suit and shirt-waist, and on the other hand that a practical tailored hat is not in good taste to wear with a dressy afternoon or evening gown. Do not make the mistake of thinking that a fancy gown will dress up a plain sailor hat, or a feather or lace hat a severely tailored costume, writes Marion Morris in the Chicago Inter Ocean.

The average busy girl requires not less than three hats for each season of the year. The winter season is longer, but the materials being generally less fragile are not so susceptible to the weather changes as the lighter summer hat materials. If you can buy only one hat to begin the season, choose a style which can be worn for many different occasions, a sort of in-between style; neither as severe as a plain sailor nor as elaborate as a distinctly afternoon or evening hat. You will find this type of hat one which you will be able to wear throughout the entire season, despite the many variations of fashion.

For instance, you could select one of the small turban, helmet or conical shaped hats which are so fashionable this year, draped with satin, taffeta or velvet, or a soft felt form with the under brim faced with plain or shirred velvet or satin to relieve the plainness. Many of these soft hats are made of hatters' plush and are worn untrimmed, not even the usual band and bow of gros grain ribbon relieving the simplicity of the crown. They are charming, especially in the small toque shapes, and the new aeroplane style, a small, close fitting hat with a tall crown and slight brim, curling upward at the left side, as is most becoming. When trimming is used, it should be very simple and practical. One or two quills are sometimes fastened at the right side, or a couple of tiny wings at the extreme back.

Small plaited fans or cockades of silk ribbon are set at the left side, and there are many effective ornaments made of silk braid in various forms which can be used as a trimming.

Black is always a safe color for a hat of this sort, as it can be worn with any color suit or dress. It could be brightened with the trimming, which could be in white, dull gold or silver. It is an exceedingly good color to wear with the various shades of brown, gray, blue or mixed fabrics. The bright shades of blue look well with gray or brown and can be worn with different color clothes, probably more than any other color.

You will then need a hat for more dressy wear, and one naturally thinks of a large hat for this purpose. This hat must be chosen with care, and should be one suitable for afternoon calling, the matinee and evening wear, unless you are fortunate enough to plan for a hat to be kept exclusively for this purpose.

If you have the knack required for placing a bow, flower or feather on a hat, this need not be expensive to be smart, as many pretty inexpensive forms can be bought ready for the trimming. Feathers are always lovely but not suitable for the business girl. There are many different kinds of trimmings which take the place of feather hats and give the nice note of dressiness without having an overdone appearance if worn downtown in the early morning hours.

least, and her room to put in order, and a thousand errands given her to be attended to at lunch time.

Now, why should this be? asks a writer in the New York Press. Why should a man be expected to live only one life and a woman two at least? It is not, surely, because the woman is stronger than the man, for the reverse is true. It is not because her work in either case is easier, for it is not—any business woman or any housewife will tell you that. It is—and here is the real reason—because human beings are conservative.

Because women once were housewives they must always be housewives, says conservatism; and no matter what else they are besides, housewives they must remain. When you bring that down to its ultimate conclusion, how absurd it is! And yet I actually know one girl who works in an office all day and is studying music by night whose mother complains that she ought to do more housework and sewing, "because it is a woman's proper work!"

Of course, there is a happy medium—where the family is very poor, or where the mother is overworked or has other work of her own, a hearty cooperation from all the children, boys and girls alike, is the only kind and decent thing to expect. But nine times out of ten a girl would rather pay for extra assistance out of her own salary than have a thousand petty little jobs waiting for her at home.

Exceptional circumstances alter all cases. But what I object to is the false distinction between men and women in this matter. Working women get just as tired as working men; and they have the same right to rest and to undivided lives of their own.

A Bordeaux pudding is made by cutting sponge cake into two or three thin layers spreading each with some kind of tart jam and crowning all with whipped cream appropriately flavored.

To remove rust from steel articles rub them with kerosene oil and let them soak 24 hours. Make a paste of emery dust and kerosene and rub on to give a polish.

Sewing Chatelaine

The lightest and most convenient of sewing cases is a chatelaine formed of a long, narrow ribbon matching the shade of the working dress and threaded through a chain of gilt or ivory rings. The ribbon is fastened with clusters of narrow ribbon bows, from which hang scissors, thimble, pin and emery cushions, needlecase, piercer, loops of embroidery, silk, etc. It is a pretty gift from the embroiderer to the embroiderer. For Christmas it might be made of cheerful red ribbon, with green-tinted ivory rings.

They are charming, especially in the small toque shapes, and the new aeroplane style, a small, close fitting hat with a tall crown and slight brim, curling upward at the left side, as is most becoming. When trimming is used, it should be very simple and practical. One or two quills are sometimes fastened at the right side, or a couple of tiny wings at the extreme back.

Small plaited fans or cockades of silk ribbon are set at the left side, and there are many effective ornaments made of silk braid in various forms which can be used as a trimming.

Black is always a safe color for a hat of this sort, as it can be worn with any color suit or dress. It could be brightened with the trimming, which could be in white, dull gold or silver.

It is an exceedingly good color to wear with the various shades of brown, gray, blue or mixed fabrics. The bright shades of blue look well with gray or brown and can be worn with different color clothes, probably more than any other color.

You will then need a hat for more dressy wear, and one naturally thinks of a large hat for this purpose. This hat must be chosen with care, and should be one suitable for afternoon calling, the matinee and evening wear, unless you are fortunate enough to plan for a hat to be kept exclusively for this purpose.

If you have the knack required for placing a bow, flower or feather on a hat, this need not be expensive to be smart, as many pretty inexpensive forms can be bought ready for the trimming. Feathers are always lovely but not suitable for the business girl. There are many different kinds of trimmings which take the place of feather hats and give the nice note of dressiness without having an overdone appearance if worn downtown in the early morning hours.

BUSINESS GIRL'S HOME WORK

Contrast with what is expected from a man.

CAN anybody give a really good reason why a girl who works outside should do any housework at home?

No one expects her brother to do it. He comes in from the office, and spends his evenings as he pleases. Dinner is ready for him, and when it is over he goes upstairs or out, and no one dreams of suggesting dishes. In the morning he eats his breakfast and goes to work, and no one breathes a word about putting his bedroom in order. When his clothes are torn they are mended, and no one would think of asking him to spend his own evening in the work.

Far otherwise is it with his sister, who perhaps works at the same office as he does, and at work quite as hard. She hurries home to help mother prepare dinner. After it is over she clears the table and washes the dishes. As likely as not she has mending to do later. And before she can leave the house in the morning there is one bed to make at

HOME HELPS

Mined chives and chervil are added to the usual seasonings of tomato salad, with decided improvement to the dish.

To cool an oven while baking never leave the door open, but cool it by the dampers or removing one of the plates over the oven.

The chicken meat left over after making soup can be used in croquettes and salads. Chop or mince it after freeing from gristle and fat and season it lightly.

A Bordeaux pudding is made by cutting sponge cake into two or three thin layers spreading each with some kind of tart jam and crowning all with whipped cream appropriately flavored.

To remove rust from steel articles rub them with kerosene oil and let them soak 24 hours. Make a paste of emery dust and kerosene and rub on to give a polish.

Kid gloves may be cleaned, when slightly soiled, with a small piece of oiled silk wound tightly about the finger and rubbed vigorously over the surface of the glove.

To avoid unpleasant odors that arise from cooking cabbage, cover it with slices of bread about half an inch thick during the boiling process.

Sewing Chatelaine

The lightest and most convenient of sewing cases is a chatelaine formed of a long, narrow ribbon matching the shade of the working dress and threaded through a chain of gilt or ivory rings. The ribbon is fastened with clusters of narrow ribbon bows, from which hang scissors, thimble, pin and emery cushions, needlecase, piercer, loops of embroidery, silk, etc. It is a pretty gift from the embroiderer to the embroiderer. For Christmas it might be made of cheerful red ribbon, with green-tinted ivory rings.

WATER NOT GOOD FOR NICE FLOOR MADE OF WOOD

IF one has been so fortunate as to secure a hardwood floor, the intelligent care of it becomes a very important matter and one which is not particularly difficult if a little thought and attention are given to the subject. Various materials are employed for this purpose, but the processes are all similar, namely, that of rubbing the surface with some sort of an oil or wax.

In general, says the Chicago Inter-Ocean, it is a safe rule never to apply water to the surface of a nice floor, at least not in sufficient quantities to wet the fiber of the wood to any extent, because all wood, even oak, is susceptible to moisture, and to the extent to which the fibers expand they will dry afterwards, and gradually cracks will appear in the boards.

If something has been spilled on the floor so that it is absolutely necessary to wash it, this should be done with a cloth wrung out of water. For the most part, however, oil and wax in some form are the proper cleaning and polishing mediums. It is said that equal parts of sweet oil, turpentine and vinegar, well mixed and well rubbed into the floor with cotton or woolen rags, is a highly successful method of treating a polished oak floor.

The acid in the vinegar cuts the dirt and grime that works into it from shoes, the sweet oil gives a luster, and the turpentine dries it.

The application of varnish to a hardwood floor is a modern method of finishing, the old-time method being that of rubbing them with wax, and a very beautiful surface may be thus produced, provided the floor has first had a thorough coating with a paste filler which fills up every pore and crack and makes a perfectly smooth surface.

OYSTERS AND NOTED AUTHORS

Bivalves and bits of verse in pleasing combination.

A BRIDE-HOUSEKEEPER entertaining several young couples rather informally in the evening made the function an oyster supper with great success. The menu bore quotations, some of which were:

An oyster may be crossed in love. —Sheridan.

There take (says Justice), take ye each a shell. They thrive at Westminster on fools like you. —Pope.

Twas a fat oyster—live in peace—adieu. —Shakespeare.

Why then the world's mine oyster, Which I with sword will open. —Shakespeare.

It is unseasonable and unwholesome in all months that have not an R in their name to eat an oyster.—Butler.

The hors d'oeuvre dishes were nothing less than natural oyster shells, extra large ones being selected for the purpose.

The menu consisted of oyster stew, boiled chicken with oyster sauce, deviled oysters in rice cups next, with a plain salad, and for dessert ice cream molded in the form of oyster shells, served with oyster crackers coated in the way so popular now, with chocolate.

The oyster stew was made by this rule: In butter the size of an egg, which has been nicely browned in the pan, cut up several stalks of celery and cook the latter slowly until thoroughly done. Add a quart of oysters with the liquor and cook until the edges curl. After the curled look appears, cook about 10 minutes longer, season with salt and pepper if liked. Serve with oyster crackers crisped in the oven.

The deviled oysters too, may require a word of direction in the interest of

OLD QUILTS

IN a certain town "down East" an enterprising concern conceived the idea of having a Colonial quilt contest. The scheme was an advertising one, but it had other advantages, for it brought forth from cedar chests, old trunks, garrets and attics long unused and perhaps forgotten quilts. Historic quilts, autograph quilts and novelty quilts of many kinds were forthcoming.

One hundred and three old quilts were exhibited and in this collection was one over 200 years old.

Which shows that the antique dealers and curio collectors haven't secured all our old American and Revolutionary quilts as yet.

CRANE'S FINE WRITING PAPERS

FOR over a hundred years the Messrs. Crane, of Dalton, Massachusetts, have been making, through succeeding generations, the highest grade writing papers. Because fabric finish papers are today more generally used, and because it possesses a very delightful writing surface, the most popular of the Crane papers is

Crane's
Linen
Lawn

We manufacture all the newest sizes—conforming with the prevailing fashions—the latest sizes of paper and styles of envelopes in addition to the many standard shapes and sizes required for all social functions. You will find these papers for sale generally wherever good stationery is sold, but if you cannot procure them from your stationer write us and we will give you the name of a stationer who will supply you.

ART OF POURING TEA GRACEFULLY AND WAY TO PRESERVE ITS FLAVOR

THE girl who has the happy faculty of pouring tea gracefully is sure to be much in demand by the hostess with large social obligations.

But so few girls possess this accomplishment, and so many shirk it, that the tea table has become the acknowledged property of the married woman. This is a mistake. A hostess's guests should be free to engage her attention in conversation rather than submerged under the thought of how many lumps, and whether one takes lemon or cream.

Pouring tea, which is a charming function when properly done, should therefore be the prerogative of the young girl whose whole attention can be given to it. And if she has poise and grace, nowhere will it be seen to better advantage.

A girl who lazily declined to acquire this simple art was forced by circumstances to preside unexpectedly at a tea table. An intimate knowledge of its equipment was unknown ground to her; the kettle refused to boil until in despair she made tea with lukewarm water; cups capered gaily away from their saucers; thin slices of lemon hugged each other so fondly that it was impossible to separate them, and the silver sugar tongs became as sounding brass, so often were they dropped. Now she advocates the ideal that every girl should be taught to pour tea properly. Here are a few rules:

First, the kettle lamp should have sufficient alcohol; then the maid should bring hot water in the kettle, so that it will take only a few minutes to boil. Lemon slices should be successfully separated when cut and not have a bit of skin that is unfit to fold them together. All seeds should be extracted. The little lemon fork should not be mislaid, but always rest on the small tray. If a teaball is used, then it should be filled before. If, however, one has to take tea from the caddy, then unscrew the top and fill it with tea and pour from that into the teacup. A silver or china waste bowl is a necessity for the tea table, and a glass fire screen is the greatest help. To keep cups from sliding about put a drop or two of hot water in the saucers. When everything is in readiness for making the tea, if a teaball is used it should rest for a few minutes in the cup with the boiling water poured over it. Then it is lifted two or three times and the cup of tea is brewed. This is a slow method, though, if one is making tea for many people. A better way is to make it in the teapot. Scald the pot first, then put in your tea, generally three teaspoonsful to two cups of boiling water, and let it stand for a few minutes. Strain and pour immediately. Serve with either cream and sugar or lemon. One can avoid the second steeping of leaves with the addition of a few fresh ones. Long steeping destroys the delicate flavor by developing a larger amount of tannic acid.

The Famous Rayo

Gives the Best Light at Any Price

When you pay more than the Rayo price for a lamp, you are paying for extra decorations that cannot add to the quality of the light. You can't pay for a better light, because there is none. An oil light has the least effect on the human eye, and the Rayo Lamp is the best oil lamp made, though low in price. You can pay \$5, \$10, or \$20 for some other lamp, and although you get a more costly lamp, you can't get a better light than the white, mellow, diffused, unflickering light of the low-priced Rayo.

Has a strong, durable shade-holder. This season's burner adds to the strength and appearance. Made of solid brass, nickel-plated, and easily polished.

DIAMOND MATCH EARNINGS SHOW LITTLE CHANGE

Business of the Company for the Year Practically of Same Volume as That of Previous Period.

THE NEW FINANCING

NEW YORK—Based on nine months of the fiscal year, earnings of Diamond Match Company for 1910 will be close to those of 1909. For nine months ended Sept. 30 earnings, including profits from California lumber operations, were \$1,186,376, compared with \$1,200,852 for corresponding period of 1909. Assuming that business continues steady during the remainder of the year, earnings will run between \$1,650,000 and \$1,700,000. This is somewhat under the figures since 1906, which have been: 1906, \$1,093,770; 1907, \$2,206,836; 1908, \$1,804,724; 1909, \$1,767,647. Severe competition and smaller profits than expected from California lumber operations during 1909 carried over their effects into the current year, although California lumber business perhaps did somewhat better in 1910.

Assuming that earnings are at the minimum, \$1,650,000, they will show over 10 per cent on the \$16,000,000 stock. From earnings, however, will come appropriations for reserve accounts. It is probable that the policy begun 18 months ago of providing liberally for renewals, depreciations, repairs and reserve accounts has been adhered to during the year. As a large or larger allowance, if \$600,000 altogether is taken from earnings for reserve, it will leave nearly 8 per cent on the stock, which is now at a 6 per cent basis.

The company has undertaken new financing in \$2,000,000 debentures which will be used for payment of notes held by banks and for retirement of the \$1,000,000 5 per cent notes if deemed desirable.

There will be no marked change in the financial position as of Dec. 1, 1910, so the effect of the new debenture is somewhat working capital, which in 1909 was \$5,509,237, will remain practically the same and whatever changes occur will be merely in form of obligations outstanding.

LAKE NAVIGATION CLOSES.

Lake navigation will close on Saturday when the last boatload of Michigan copper for the current season will be shipped to Buffalo. The winter rail and water rate will be the same as in previous seasons—50 cents per hundred, as compared with the summer water tariff of 18 cents per hundred.

BOSTON & MAINE AND NEW HAVEN CAR PURCHASES

Large Additions to Equipment Are Made by Both Railway Systems During the Past Twelve Months.

Probably the extent to which the New Haven and Boston & Maine roads have added to their equipment during the past three years is not generally realized. During the period from June 30, 1907, to June 30, 1910, the New Haven expended \$23,169,130 for new equipment, and the Boston & Maine \$8,466,754. By far the largest percentage of this outlay was for new freight cars, the New Haven alone adding 2420 during the past fiscal year, and the Boston & Maine 1378, representing an expenditure of \$1,576,993 and \$1,176,632 respectively.

The following official figures show the additions to equipment during the past fiscal year, and the number of cars and locomotives retired:

NEW HAVEN.	
No. added.	No. retired.
Locomotives	84
Passenger cars	1,512
Freight cars	2,420
Work equipment	887

BOSTON & MAINE.	
No. added.	No. retired.
Locomotives	120
Passenger cars	1,378
Freight cars	1,378
Work equipment	1,401

The amounts expended during the year ended June 30 last and the three years ended the same date, on account of new equipment, are shown below:

BOSTON & MAINE.	
Year ended.	July 1.
June 30, 1909	\$1,176,632
June 30, 1910	\$1,576,993
June 30, 1911	\$1,176,632
June 30, 1912	\$1,176,632
June 30, 1913	\$1,176,632

THE STOTESBURY PLAN ACCERTED

PHILADELPHIA—It is said that a plan has been agreed upon by the directors' committee of the Union Traction Company to meet the Stotesbury stipulations. This calls for passing the title of the Market street elevated from the Philadelphia Rapid Transit Company to the Union Traction Company and gives the Union Traction Company full control of the subway and elevated property. The plan was agreed upon with the understanding that the stock of the Market street elevated shall be deposited by the Union Traction for a new collateral trust loan.

AMERICAN NUT & BOLT MEETING.

PITTSBURG—The annual meeting of the stockholders of the American Nut & Bolt Fastener Company will be held in this city on Dec. 12. Nine directors are to be elected to serve for the ensuing year.

C. F. JOHNSON IN LEAD, HIS FRIENDS SAY, FOR MAINE SENATORSHIP

Has 60 or More Democratic Members-Elect to Legislature Pledged to Him According to Their Count.

GARDNER IN RACE

WATERVILLE, Me.—Indications point to the election of Charles F. Johnson of Waterville as United States senator. Sixty—and some say more—of the Democratic members-elect of the Legislature have pledged themselves to Mr. Johnson. Friends of Obadiah Gardner of Rockland say that practically the whole of the second congressional district is for Mr. Gardner. Friends of Mr. Johnson, on the other hand, declare that the second district has many Johnson supporters, and that even one member of Mr. Gardner's home county delegation will cast his vote for Mr. Johnson.

Formal announcement will be made soon that George M. Hanson of Calais has withdrawn from the Senate contest. It is reported that practically every vote that was counted for Mr. Hanson will go for Mr. Johnson.

The fourth Congress district elected in September 29 Democrats to the Legislature, of whom 25 are for Mr. Johnson, two are for Mr. Gardner and two are doubtful.

In the third district there were also 29 Democratic legislators elected. Mr. Johnson has 24 with five doubtful. This gives Mr. Johnson 49 votes from the two eastern districts.

In the second district there are 20 Democratic legislators. Of these Mr. Johnson has 10, including one vote from Knox, and Mr. Gardner has nine. Seven votes are doubtful.

In the first, 24 Democrats were elected to the Legislature. These votes have generally been conceded as likely to go to George F. Haley of Biddeford or William M. Pennell of Brunswick and a strong effort has been made to keep them united.

Mr. Gardner has the pledge of one vote from the first district, even if Mr. Haley or Mr. Pennell or both are candidates, and Mr. Johnson also has one first-district vote in preference to the local candidates. Regarding the other 22 first-district men as doubtful, would leave the summary, so far as Mr. Johnson and Mr. Gardner are concerned, as follows: Charles F. Johnson, 60; Obadiah Gardner, 12; doubtful, 36; total, 108.

PUBLIC LIBRARY RECEIVES A GIFT OF RARE OPERAS

Manuscript scores of rare operas and other music comprising what is known as the Vintzini collection, were received today at the Boston public library as a gift to the Allen Brown collection by Henry M. Rogers and his wife, Mrs. Clara Kathlenn Rogers.

Mrs. Rogers was a daughter of John Barnett, "the father of Modern English Opera," as he has been called, Domenico Dragonetti Barnett of Cheltenham, Eng. The Vintzini collection consists of 13 bound volumes of the personal and private collection made by Louis Albert Vintzini (1841-1906), pupil of the conservatories of Paris and Brussels, solo violinist at the Theatre-Lyrique, director of the Theatre-Porte St. Martin and Gaite, manager of the Royal theater at St. Petersburg, director for one season of the orchestra at Pavlovsk, manager of the Varietes, Les Folies Dramatiques, La Lyrique and La Gymnase, Paris, also of the Grand theater of Lyons, etc., all of which theaters he produced many masterpieces.

Besides the scores of the operas, and the original letters from composers and singers taking part in the performances, these works contain many original drawings made by well known artists who superintended the costuming of the operas, and other interesting contemporary data.

Following are the works in the collection:

Gounod, Ch.—"Jeanne d'Arc," 1873; Joncières, V.—"Dimitri," 1876; Offenbach, J.—"Le Voyage dans La Lune," 1875; Erlanger, Camille—"Le Juif Polonais," 1900; Piere, Gabriel—"La Fille de Tabarin"; Bruneau, A.—"L'Ouragan," 1900; Massenet, Jules—"Cendrillon"; Humperdinck, E.—"Hänsel et Gretel," 1900; Saint-Saens, C.—"Le Timbre d'Argent," 1877; Piere, Gabriel—"Vendee," 1897.

The original manuscript of operatic scores by John Barnett include: "Win Her and Wear Her," 1832; "The Mountain Sylph," 1834; "Fair Rosamund," 1837; "Farinelli," 1839.

JUDGE DILL TO RESIGN

NEW YORK—Gov. John Franklin Fort of New Jersey states, according to the American, that Judge James B. Dill, who, as a lawyer, is said to have received \$1,000,000 fees as the framer of trust incorporation, has decided to resign from the court of error and appeals.

RECOUNTING BALTIMORE

BALTIMORE, Md.—Attempts by the mayor of this city to gain a recount from the federal census bureau having failed, the police have begun a second census.

Claims to Have Second Congress District for the Maine Senatorship

CHARLES F. JOHNSON.

Waterville man who is said to have pledged of sixty Democratic members of Legislature.

SPECIAL RALLY FOR DORCHESTER IS TO BE HELD

A specially arranged civic rally in connection with the civic advance campaign of Boston-1915 will take place tomorrow at 8 p. m. in Greenwood hall, Glenway street, Dorchester, at the request of the Harvard Improvement Association of Dorchester.

George E. Johnson, president of the Playground Association of Pittsburg, will deliver an address on playgrounds, and Cornelius A. Parker, an attorney, will speak on "Boston-1915." J. W. Dowling of Dorchester will preside.

Rallies were held last night at Dorchester, Charlestown, Roxbury, East Weymouth, Medford and Watertown. At the Dorchester high school, Matthew Cummings spoke on the needs of rapid transit in Dorchester. He said: "Transit facilities have not improved in Dorchester to any appreciable extent in 10 years. It takes 30 minutes to travel from Dorchester Lower Mills, Neponset or Mattapan to the North station."

"If the time waiting for cars is counted, it means that an hour's time is used in going to the city and another hour in returning."

SUFFRAGISTS AT PARLIAMENT.

LONDON—Three hundred and fifty suffragettes made a concerted effort to pass the police guard today and enter the Parliament building. They were dispersed as gently as possible, but renewed the effort time and again. Crowds, a majority in sympathy with the women, gathered and assisted them.

REAL ESTATE NEWS

C. H. Lewis, 15 State street, has purchased from Grace E. Stevens the property at 72 Winchester street, Medford, consisting of a two-family house and about 6000 square feet of land, having a total assessment of \$3400. Mr. Lewis has sold the property to Edna M. Pope of Boston. The broker in the transaction was Henry E. Chamberlain, Tremont building.

LATE CITY PROPER SALES.

The brick and frame buildings numbered 350 and 352 Hanover street, junction of Tilden street, North End, have been sold by Charles W. Swan and another to P. Robert Greene and another. The assessed valuation is \$32,200, of which \$29,300 is the rating on the land.

Giovanni Cerallo has purchased from Julius Rottenberg the four-story brick building numbered 23 and 25 Cooper and 33 North Margin streets, being a corner estate, together with 750 feet of land, all rated at \$9400, of which the land carries \$4900.

Deeds have gone to record transferring to Lewis Kaufman the title to the four-story well-front brick dwelling and 1427 feet of land at 109 Chandler street, South End. Of the total rating of \$9100 the land carries \$4300. George C. Whittemore is the grantor.

The four-story octagon-front brick dwelling and 2205 feet of land at 13 Claremont park, South End, recently purchased by Isaac Heller, have been sold by him to Helen B. Jones, who takes title through Thomas M. Smith. The land is taxed on \$2700 and the building on \$5500.

OTHER TRANSACTIONS.

Property at the junction of Academy Hill road and Chestnut Hill avenue, Brighton, has been sold by James A. Hathaway. He disposes of a large frame house and 16,883 square feet of land, taxed for \$5200. The assessors' value of the lot is \$2400. The purchaser, William Killion, will occupy.

Samuel D. Crafts has sold a lot of land situated on Crafts road, Chestnut Hill, Brookline, to Frank J. Bartlett. It contains 14,081 square feet and it is understood Mr. Bartlett will erect a house for his daughter, Mrs. H. E. Nesbitt of West Newton. Coffin & Taber were the brokers.

C. Ernest Judkins has sold at auction

MR. TAFT IS WRITING CONGRESS MESSAGE AS HE SAILS HOME

COLON—President Taft is engaged today in dictating his message to the coming session of Congress, if he carries out his intention as expressed when he sailed for home at 6 p. m. on Thursday aboard the armored cruiser Tennessee.

Mr. Taft looked over the Pacific division of the canal, and from a tug examined the completed section on his last day here. This is the President's fifth visit to the isthmus, and his popularity among the natives and the canal workers is everywhere manifested.

On the eve of Mr. Taft's departure 100 boilermakers dissatisfied that after hearing their complaints the President would give no immediate answer to their demands, gave five days' notice of quitting their work, and sailing for home. Several of the unions of machinists and blacksmiths are threatening similar action.

It is not proposed to strike, but simply to resign and leave the isthmus. Only hourly employees, constituting 25 per cent of the force, are likely to be affected.

President Taft promised to consider the matter fully and cable his answer from Charleston, but this did not satisfy the boilermakers.

COAL IN SMALL SIZES ADVANCED

An advance of 25 cents per ton in the prices of chestnut and 1.2 and 3 buck-wheat anthracite coals today called attention to the question of possible advances in the domestic sizes. At present stove coal is 25 cents per ton cheaper than it was at this time last year, according to local authorities.

Some of the leading Boston dealers said today that domestic coals should be higher, but that they could not tell whether or not there would be an advance soon. The retail market is governed entirely by the wholesale market, they say.

It is claimed that there is a shortage of small sizes of coal and consequently the increase in the prices.

OPPOSE TRANSFER OF BATH MONEY

Mayor Fitzgerald believes the South Boston Citizens Association is making a mistake in opposing his proposition to transfer the South Boston bathhouse appropriation of \$50,000 to the fund for a new municipal building in South Boston, and he has sent a letter to the association telling the members so. The letter was read at a meeting held Thursday evening.

The motion that the association go on record in favor of the mayor's plan failed to pass, however, and was laid on the table until the next meeting. Mayor Fitzgerald and Councilman Thomas J. Kenny were invited to attend the next meeting and express their opinions regarding the subject.

REAL ESTATE NEWS

for Richard C. Humphreys, trustee, a lot at the junction of B and Fifth streets, South Boston, containing 2734 square feet, assessed for \$3100, to Patrick W. Flaherty. The price was 40 cents per square foot.

Through the office of Herbert S. Frost, a new three-apartment frame house, at 41 Alpha road, Dorchester, occupying 2657 square feet of land, has been bought by Paul A. Koehler for investment. The house is not yet taxed, but the land is rated at \$700. Mary O. Duff gave the title.

Rush & Co. report the sale for James H. Floyd of his frame house, numbered 3 Hillside terrace, near Bailey street, Dorchester. There are 1880 square feet of land, taxed for \$400, with a total rating of \$2900. The purchaser is Margaret C. Bauch, who will occupy.

Frank B. Noyes & Co., Thompson square, have conveyed for Mary A. Noyes a modern two-family frame house and 3250 square feet of land, 33 to 35 Victoria street, Somerville. The purchaser is John F. Eager.

The entire building at 228 Washington street, city proper, has been leased for a term of years to Harry H. Arousou, who will remodel and occupy the store and basement for a shoe store. The lease was negotiated by George S. Parker and Coffin & Taber, 24 Milk street.

Playwright and Writer From Germany to Address Authors' Club in Boston

BARON VON WOLZOGEN.

Baron Ernest Ludwig von Wolzogen, famous German author, poet and playwright, is coming to Boston on Monday. He will be entertained by the Boston Deutsche Gesellschaft at dinner at the University Club before his address in the Hotel Somerset in the evening to members of the Authors' Club.

His father was the superintendent of the court theater of the Grand Duke of Mecklenburg-Schwerin. His mother was English. He studied at Straassburg and Leipzig, taking courses in philosophy, architecture, language and music and early achieved success in scholastic pursuits.

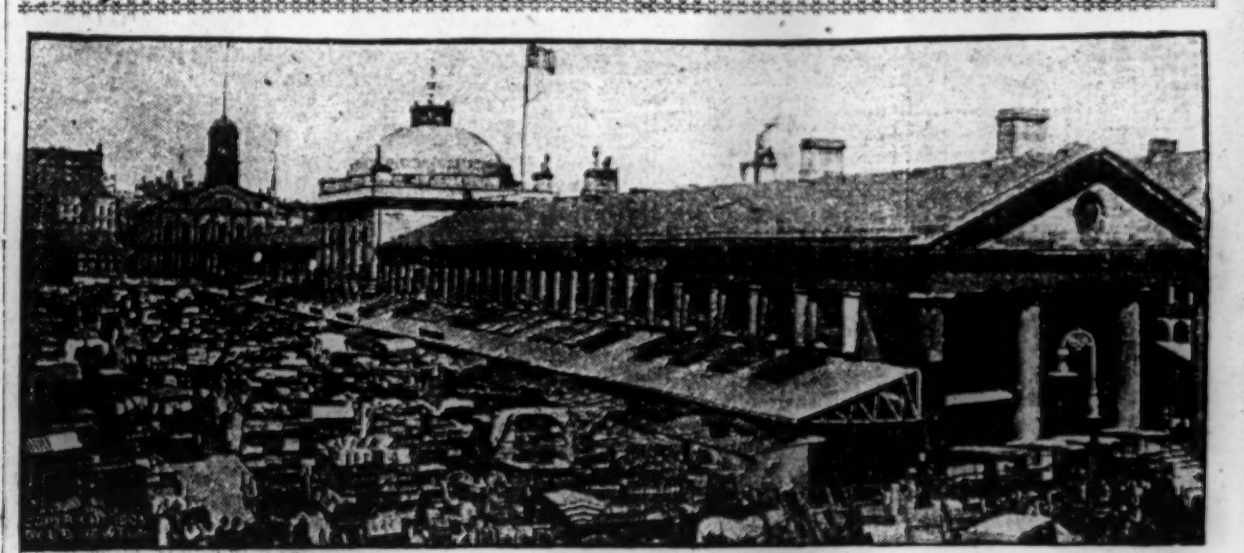

After spending several years at the court at Weimar he came to Berlin at the time Franz Liszt had come into prominence. He spent seven years in Munich and five years in Berlin and then in 1905 went to Darmstadt where he has lived since.

He early began to write the novels that have made him famous and during the 35 years of his literary career has published 50 volumes of novels, short stories, plays, poems, etc.

DANCING PARTY IN COPLEY HALL

The annual fall dancing party of the employees, association of the Houghton & Dutton Company was held in Copley hall Thursday evening with 500 present. Members of the firm and representatives of similar organizations in other stores were guests. There were special feature dances and electrical effects designed by the store electrician, Henry Schaefer. E. P. Morse and S. H. Thurber. The entertainment committee was made up of T. F. Crosby chairman, W. B. Kay, W. J. English, C. B. Doyle, H. J. Campbell, W. R. Richards, W. McNamara, R. T. Giles, Miss E. A. McGrath, Miss M. Rockett, Miss M. E. Hagan, Miss M. A. Keefe, Miss M. A. Bartlett and Miss K. A. Murphy.

TURKEY PRICES BEGIN TO SOAR

Poultry dealers said today that the demand for Thanksgiving turkeys is not as heavy as usual and that the prices are above the average—30 cents a pound wholesale, which brings the retail price to about 35 cents.

For extra birds the wholesale prices run as high as 35 cents, which brings the retail prices up to 38 and 40 cents.

The first shipments of Vermont and Rhode Island turkeys are now arriving in Boston. In the next few days, carloads of turkeys will be brought into Boston from all parts of New England.

OFFICIAL RETURNS AT STATE HOUSE

Official returns for the state election have been received at the State House from nearly all cities and towns of the commonwealth, it was said at the office of the secretary of state today.

The time for filing returns expires by law Saturday night. It is expected that the returns will go to the executive council Monday, and that tabulation results of the official figures will be made public about a week later. The returns being made in certain sections of the state may delay the official count.

FIVE LOCOMOTIVES BURNED.

NASHUA, N. H.—The Boston & Maine railroad roundhouse at the junction was destroyed by fire today with five locomotives. The loss is estimated at \$75,000.

THE HOME FORUM

"A MAN'S A MAN"

And is likely so to continue.

THERE is really no more amusing feature of the "feminist movement" of these times than the apprehensions expressed gravely or gayly by many observers lest in the end the former position of men and women shall merely be reversed, and the man show forth the weakly feminine qualities which have hitherto been supposed to make woman appealing and dear.

The funny papers caricature the submissive husbands staying to tend house while the wife parades in political demonstrations and even the philosophers are found theorizing about the various species of insect life where the male is wholly inferior in development and in power to the female. The latest contribution to this subject might be found in a recent "beauty show for men" held, it is said, in England. A boatman who holds the Royal Humane Society medal for courage was among the winners of prizes, and also an exile Turk and a headman. Each "beauty" places his head through a velvet curtain inside a gold frame, and the verdict is thus given

without regard to the man's station, which might be hinted in his dress. But for the reassurance of those who consider that this exhibition of masculine vanity is a token of present weakening of fiber in Englishmen—to say nothing of "the Rooshian and the Turk"—we may hark back to the English days when to be a dandy and a beau, a glass of fashion and a mold of form, was to be hand in glove with king's councilors and to hold the destinies of other men in one's lilac kid grasp. This English masculine beauty show—if it exists outside the imagination of a lively American contemporary—is a relic of the past, like the absurd conception of womanhood which is so rapidly disappearing from the earth.

The very terms "Miss Nancy" and "Sissy" prove that the masculine garb has not always covered the heart of a hero. And in point one may cite a courteous gentleman who rebuked his son for a disrespectful allusion to his maiden aunt.

"My boy, in all my life I have never seen but one old maid, and he was a man."

College and the Fine Arts

A WRITER (a college woman) has this to say in the Ladies Home Journal about the place of the fine arts in college courses: If a girl is to be a musician she must let what is to be the capital of her future drop into insignificance for four years. Why? "Because music doesn't count for the degree," they tell her. Why doesn't it count? Is it not just as instructive, just as necessary, just as important in culture as Dante or ancient history? That is the pity of all this college process—it takes up itself the arrogance of limitation, pronouncing what is and is not of value to individuals whom it herds, wholesale into "liberal arts."

I know of two very unhappy women—very young women, who have no business being unhappy and who resent it; one of them teaches school in a city in the South.

"There was nothing else for me to do," says the girl loftily. "When I went to college I had to give up my violin or else take six years to the course, in order

to have time to practise. I hadn't the courage to stay six years in college—after my freshman class would have been graduated and everything—so I dropped my fiddle. And here I am"—she spreads her hands bitterly—"teaching school! It was all I could do by the time I was graduated! Oh, if girls only realized the talents they yield up forever when college gathers them in!"

And the other woman—who lives in Paris, and is an artist who is acknowledged the title—looks at one strangely when one envies her, and shakes her head. She says, "I've lived alone in studios this way since I was 18—why, I never even went to college! They give one no credit for art, you know, and I couldn't afford to lose a year if I were to become anything. Still—I don't know. When I realize how tight within this one world of paint and charcoal I am—how little I know of girls, and how desolate I am of those enduring school friendships—sometimes all my success seems absolutely worthless. The life I lead has only one adjective: shifting."

What that girl lacks is community education. College denied it to her in denying her art a place in its curriculum. And so the socialization every individual needs—and craves at heart—the tempering of provincialisms and the wearing away of prejudices, the responsibility and inter-reliability such as college does teach so well must be lost to many women who cannot afford to give four precious years to irrelevant actual instruction.

POISE

When you lose your temper, when you procrastinate, when you get nervous, excited, when you are blue and disappointed, when you worry, you lose much of your energy, your efficiency; you cannot bring your whole, complete positive man to your task. Never mind what others do; run your own machine, think your own thoughts, live your own life. Keep your poise, your serenity. Do not imitate, follow, pretend or pose. Be fearless, self-reliant, independent. Be yourself.—Success Magazine.

A Gold Story

Early settlers in South Australia were told by the natives that "up country" there was a cave full of gold, but they did not attach much credence to the report. A half-caste has just arrived at Adelaide with the news that some 400 miles north of Fowler Bay he came upon a series of caves, one of which had "pendants of gold like bunches of grapes."—Chicago Journal.

Speaking of the origin of slang phrases, perhaps some readers of Thackeray have overlooked the passage in "The Newcomes" (chapter xxx), where he speaks of "the hot air of the previous night's talk."—Buffalo Commercial.

For the Singers

Dr. Wullner set the fashion for good declamation among us—at least he made us think more about it than any other song singer who ever came to us. It is interesting to read in a criticism of a young New York singer in the Tribune that he knows how to make pure lyric art serve good declamation. For Dr. Wullner did not always exemplify the pure tonal beauty which we all really crave in a singer. Now it is perfectly possible to speak the words like cut steel when the voice poise is right. The consonants come like live quivering things to the lips when the voice is free. Let no young singer forget this, and let them test their tone by the trill of the R at the tip of the tongue. If this is as little as an electric buzzer, only a thousand times more so, one may know that his throat is properly loose.

The young New York singer, by the way, included an interesting work on his program which the critic, however, disapproved. It was the setting for Goethe's "Erlkönig," which is put together by a modern composer from sketches by Beethoven. It is said to be too reminiscent of Schubert, which it could hardly have been if Beethoven himself had finished it. Mention was also made of an excerpt from Monteverdi's "Orfeo," "Ecco perch' a voi ritorno."

Work is its own best earthly meed.—Jean Ingelow.

"THE GLEANINGS OF THY HARVEST"

IT IS sometimes said that the Old Testament is the word of a severe and unrelenting law, while the New Testament is the gospel of love. But there is a deep unity, indeed one Principle, underlying both these codes, and for one who is looking to see the love shining through there are many beautiful surprises in a close reading of the old Jewish code. The very law that exacted an eye for an eye—and surely we must all exchange the false sense of seeing for the true, which is doubtless the deeper meaning of such a passage—is the same law that bade the children of Israel not wholly to glean the field and the vineyard, not "every grape," but to "leave them for the poor and stranger: I am the Lord your God."

This idea of sharing one's richer treasure with the poor is an essential in the Scripture teaching. Indeed, this sharing is a condition of possession. The Jews believed that God blessed the harvest of the generous, while the niggard and fearful reaper, who would gather all for self, might find famine one day. The asceticism of certain periods of religious history is a reversal of this old Jewish ideal, and herein is the secret of the failure of men's efforts to take the

kingdom of heaven by such violence. The simple natural law of good, of fellowship and good will, has much to do with any man's spiritual progress. The interchange of good offices, whether in the sharing of material things or of spiritual, is necessary if the store of each is to remain. Withholding is what impoverishes, not giving.

It is sometimes said of Christian Scientists that they do not work in the lines of ordinary charitable giving, and that they seem so content within their own circle that they do not sufficiently share their spiritual joys. Now Christian Scientists individually are probably as much concerned with charitable works as the individuals of any other group of people. There has been so much ready and spontaneous giving that the need for organized work in such directions has not been felt. Organized charity is needed in the world for two reasons, first to remind people of their duty to those less fortunate with whom they do not often come in contact, and second to see that the charity is bestowed in the most helpful ways. As the work of Christian Science has grown larger the beginnings of an organized charity are already seen, since this need now may perhaps be wider than individual work can cope with. But whether their bounty is given—or better, is shared—through individual or through united action, Christian Scientists have even better reason than many other people to understand that this sharing is essential to their own welfare. It is divine Love seeking the weal of the poor which impels each one to give; and those who deny this gracious impulse within them close their doors upon angels, and find their own halls silent and deserted from this inhospitality to the promptings of Love.

If Christian Scientists do not proceed with a religious propaganda by the methods of the past this is not because they do not long to share their spiritual store with others. The parable of the feast which was spread and to which the many were asked is one of the Master's teachings on this subject. It was the evidently needy, those who felt their own need, who at last came and filled the tables. The others were absorbed and content with the things of the material world. Therefore for all who seek, Christian Science keeps an ever-open house and a table supplied to suit every need.

Take for example The Christian Science Monitor, which brings a word every day

to remind men of God, which one may read or not, as he will. This daily manna is not for laying away in fear of future lack. It is the type of the daily supply, to be accepted and used and then shared. The fresh coming of the newspaper makes it the better type of the ever-present bounty of God. One should not lay it painstakingly away lest there be no more good of equal fitness; but one should take it cheerfully, rejoicing in what brings him joy and then pass it along. This is in the spirit of the command that the whole field shall not be gleaned, nor every last grape. The printed page is further a type of the ever-flowing fountain of divine blessing because what one takes from it does not diminish it, and for a long period the words may pass to gladden one heart and another and none lose thereby. To clip the message about God from the page and send it along is to make an unnecessary separation.

The Monitor is a type of the wholeness of human life here and now, of that whole and seamless garment of love and service which all may weave of their daily doings. Back of all, through all, is the ideal of purity and brotherhood, love of all things that are of good report and which bring present peace and comfort to any, anywhere. This beneficence, meeting the human need just where it is, is a type of the prevailing blessedness of divine Life. Mortals shall not some day wake up suddenly to find the love of God all around; they rather grow slowly from stage to stage of understanding, till at last all that is unlike God's love has disappeared. And so the daily thoughtfulness for the present human needs of others, physical and mental as well as spiritual, is a pure type of ever-present good, and as such is not to be neglected nor despised by any.

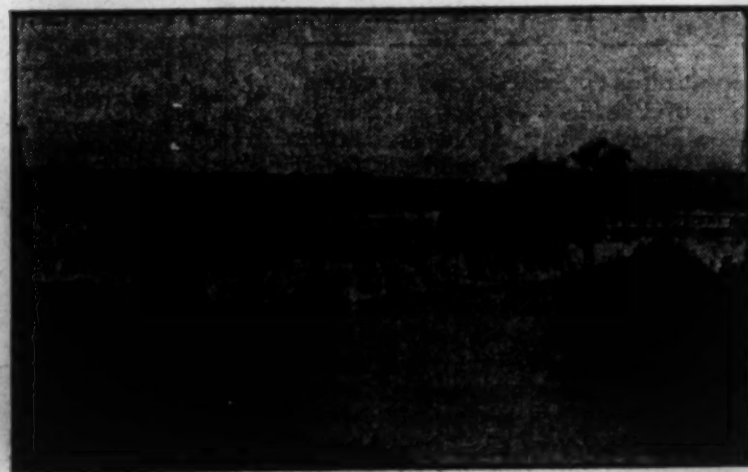

It is not the lofty call of Lord, Lord, but the doing the good will of God on earth to all men that proves us true followers of divine Love.

A Faithful Friend

A remarkable story of the intelligence of an elephant is current just now in the English press. On a late occasion the river Ganges rose suddenly when hundreds of persons were bathing. This elephant swam out repeatedly to the people, with ropes attached to his trappings, and clinging to these they were brought safe to shore.

There are at the present time over 21,000 varieties of postage stamps in the world.—New Haven Palladium.

Rivers of the Southwest

GRAND FALLS, JOPLIN, MO.

In Grand creek, in the Ozark mountains.

WANDERING about the map to locate these remarkably interesting falls the stranger to these southwestern parts where "Missouri," as the native says it, joins Arkansas, with its French final syllable, one is astonished to find what a number of things in the shape of rivers are to be traced hereabouts. These falls are in what the map names Grand creek, very close to Joplin, Mo., the city where zinc is so plentiful and other unusual sorts of minerals. This creek flows along southwestward and presently becomes the Neosho Grand

river, and that meanders on, an ever widening stream, till it reaches the Arkansas. The Arkansas would be a giant stream in any other region, but here its fame is overshadowed—overflowed, one would better say—by the mightiness of the Father of Waters, and the Arkansas becomes only one of the southern tributaries of the Mississippi.

And all this riotous water flowing over these wide rocky shelves in the picture is just a "creek" to southern Missourians!

FALSITIES IN FICTION

There can be no question that this tale is a right arraignment of much of modern fiction. Novels too often present the wrong side of things, and give the color of the writer's viewpoint—which is that of the fictionist rather than that of the normal man and woman living out the give and take of daily life.

A further commentary on the fiction writer who seeks to make striking and telling stories without much regard to their effect on the imagination of readers is seen in an interview reported in a

western paper with one of the popular writers of trashy love stories. This lady confessed that she had herself "never been in love" or had any experiences of the sort she describes so romantically. In other words, she merely imagines all that she writes and is content to go on giving her readers false notions about what life is like and the bearing of men and women under various circumstances. Great novelists are those who have lived or seen what they write and therefore know that it is true; who offer their readers honest pictures of human experience and noble examples of the conduct of life; men and women who are simple and strong and sincere; who do not "write up" evil for the sake of sensationalism, but who cast their influence on the side of goodness and hope, who know what is strong and true in humanity and who give power to that, in the long run, rather than to the wrong;

Illustrators and Authors

ILLUSTRATION of a book or a poem is of no value unless it illumines or at least comments on the text, says a book collector. Yet in book after book, even among editions de luxe, there is every evidence of hasty preparation and we find in the pictures contradictions of the story so absurd as to be ludicrous were it not for the serious blamish of the work and the evidence of slipshod methods on the part of the artist.

A striking example is seen in a great artist's illustrations to Poe's "Raven." Here the poet is seen in his chamber reading a "volume of forgotten lore" and with him is a child. Now, in the poem there is no mention of a companion to witness the scene between bird and writer. In fact, the whole genius of the poem forbids such a thought; and one strong line reads: "Leave my loneliness unbroken." Of course, the poem may be less expressive in the French versions with which the illustrator was no doubt familiar. The point is that in any form of art work nothing can take the place of conscientious study and that no amount of genius compensates for slighting that genius which we are told is the capacity for taking pains.

Buttons and Betterment

We have observed that when any crusade for worldly betterment effloresces in a button, it becomes irresistible. Public sentiment may spread long and furiously, man by man inculcated with a new idea and infused with a firm resolve, but until it bursts out in the bold blazonry of open acknowledgment and active proselytism its effect on public action remains feeble. Badges, buttons, banners proclaim that the real conflict has begun.—St. Louis Globe-Democrat.

God scatters love on every side,
Freely among His children all
And always hearts are lying open wide
Wherein some grains may fall.

There is no wind but soeth seeds
Of a more true and open life,
Which burst, unlooked for, into
high-souled deeds
With wayside beauty rife.
—Lowell.

A CONQUEROR

A POEM entitled "William the Conqueror II. William Penn," in the Midwestern, has the following tribute to the father of Pennsylvania:

His sense of right o'erpowering the bent
Which nature on him thrust with strenuous hand,
He gave his sword to idleness and rust,
Became an envoy of the angel, Peace,
And cast his lot with people much despised,
To follow where his truth might lead him on;
He who was welcomed at the courts of kings,
In gloomy jails lay with the bruised of fate.
His truth led over tempest-chastened seas,
Where woods primeval spread their living tents,
And there he made a home to freedom dear,
Not only for his own faith's sore beset,
But for all whom dread persecution scourged;
His heart was like an ocean on whose breast
Two argosies of ev'ry land may sail.

'Twas his to do what gen'als could not do,
Subdue the red man, making friend of foe;
'Twas his to win on bloodless battle-fields,
The victory of the noblest conqueror;
The noblest of all conquerors is he
Who conquers through the gentle pow'r of love;
A pure and holy temple was his soul,
All dedicated and sanctified to love;
And history has many a page that tells
The world of William, conqueror of hearts.
—Albert Lindley Beane.

Antiquity of Cabbage

Cabbage, in its many varieties, has been developed from a single wild growth called Brassica Oleracea, which in its wild state is very remote in appearance from our cabbage. Kale, cauliflower and collards come from the same origin. The principal cultivated varieties of all these are known to have existed as far back as the sixteenth century. Cabbage, however, is an infant compared to lettuce, though why a man would take to lettuce first when he could have cabbage or both just as well, seems singular.—Kennebec Journal.

PUZZLE.

Topaz

Message in a Muffin

The boyish love of adventure and of successful evasion of pursuers is being gratified in a delightful way by the training which the boy scouts undergo. Sherlock Holmes stories must pale in interest beside the actual doings of the boys who now under proper direction and for a useful purpose are living out the very sort of stories that they love. A case in point is the following, from the London Standard:

Two boy scouts from Rawtenstall, Lancashire—Scoutmaster Edgar Brown (18) and Scout James Ramsbotham (16)—delivered a message on Saturday to the mayor of Rawtenstall from the lord mayor of London. They left Rawtenstall on Sept. 23 with a message from the mayor of that town for the lord mayor, trapped to the metropolis, and delivered the message on Sept. 30 at the Mansion House. They carried the missive inside a Lancashire muffin, and

Another Railway Merger

ALTHOUGH it is not entirely easy to reconcile the plan of President Charles S. Mellen of the New York, New Haven & Hartford and the Boston & Maine railroads for the purchase of the Boston, Revere Beach & Lynn company with the lukewarmness of his recent report on proposed electrification of his lines within the metropolitan district, this latter project is likely to receive hearty endorsement from all who look generously upon its various phases. The tendency of the transportation activities in Massachusetts and northeast and southeast New England has been toward centralization of control and responsibility in one mammoth corporation, which shall answer to the Legislature and the people. Backed by adequate capital and managed by able men, this corporation is seemingly equipped to do more for development than ever could have been accomplished by the numerous scattered components which previously handled traffic in the different sections.

The Boston, Revere Beach & Lynn railroad, one of narrow gauge, has a large patronage along its ten-mile route from East Boston to the edge of Lynn. Operated since 1875, the road has proved profitable, but the heavy income during the summer months has been sliced perforce by the falling off in winter travel. Now President Mellen proposes to take the "Narrow Gauge," build a tunnel under the harbor between the South station and the present East Boston terminus, standardize, electrify, improve the roadbed and introduce steel cars; then extend the road to Beverly, and possibly to Rockport, and do it all within two years at a cost of \$17,000,000. This would mean connection of the whole North Shore region with the South station, and its lines to the south and west, and with the Boston Elevated cars.

The tremendous advantage to suburbanites of such an arrangement are apparent. With connection established between all the railway lines in and around Greater Boston would come an immense saving in time and ultimate economy. Real estate unquestionably would rise in value with the improved facilities for getting about. The North Shore would boom as it never boomed before, and the acquisition of the "Narrow Gauge" would open opportunities for other summer traffic that would benefit New England greatly. Moreover, the possibilities of this ostensibly local improvement as a factor in through service from points north of Boston to points south and west give ground for highly interesting speculations as to the future use of this route as a means of avoiding a transfer across or around the city. The feasibility of the immediate plan, as outlined, and the growing realization that consolidation is exploiting and building up New England more than any other agency, make this proposition look acceptable. If the United States government plans to make Rockport a naval base, improved railway facilities there would further the undertaking. What merits even more serious thought, however, is the idea that Rockport might sometime be made the mail and passenger terminal for European steamers. The elimination of a day's time between Europe and New York appeals to both the steamship companies and the traveling public, and making Rockport a Liverpool might make Boston a London, instead of having Boston occupy the former position in relation to New York. The expense of equipping Rockport harbor for such a project undoubtedly would be enormous, but not prohibitory, and the plan is, at least, worth investigating.

Naturally the interests behind the Boston & Eastern Company, which has asked for a "certificate of expediency" authorizing the building of a tunnel under Boston harbor, and chiefly over private right of way, maintaining stations in Boston, East Boston, Revere, Lynn, Salem, Danvers and Peabody, and costing \$11,000,000 in all, see in the Mellen petition an attempt to block their plan. But the public advantage must be the object of any transportation project, in this or other territory, and it is for the Legislature to decide which of these agencies is better equipped to serve the interests of the people. Where public convenience is affected to such an extent as it will be by this decision, there is no middle ground.

Good in College Fraternities

AFTER all the criticisms, some merited and some unjust, heaped upon the college fraternities, it is refreshing to have a declaration from an educator like Dr. Guy P. Benton of Miami University, Oxford, O., that after mature deliberation he has changed his opinion and thinks they may become a power in maintaining constitutional ideals. Whether Dr. Benton's amended viewpoint bears any relation to his decision about accepting the invitation to become executive head of Boston University is an interesting question, perhaps; but in any event a high degree of courage on his part was required to exercise in this case a privilege common to every one, and of which few like to avail themselves. For while ideas and opinions may come and go, the college fraternity seems to be a well-grounded institution.

With all due regard to Dr. Benton's past thoughts on the subject, therefore, it is a pleasure to endorse his present-expressed belief in regard to the fraternities. They certainly can be made a strong factor for advancement in university life, when properly conducted. It is the clannishness of some and the pursuit of unhelpful objects by others that brings much antagonism to them. A few are purely innocuous in nature, seemingly, and interfere with study. The larger colleges and universities that have troubles in this respect might profit, if they would, by following the example furnished at Wellesley, where the "secret" societies already have begun to reform themselves. Qualifications for membership in them now are, as they have long been in the case of the principal societies of Smith, on an academic basis, popularity being a minor consideration.

Every sort of organization should vindicate its existence by serving a useful purpose. The college fraternities are no exception, for they may assist or hamper learning. University presidents in general have small disposition to overlook the usefulness of the fraternities; hence they are slow to criticize. While in certain ways the fraternities are immensely helpful, an artificial atmosphere of exclusiveness too often has been allowed to surround them. The time is ripe for turning the strength of the fraternities to the benefit of the entire membership of the colleges.

The British Crisis

CAREFUL students of the constitutional crisis in the United Kingdom cannot fail to see that from the point of view of the thinking class in the islands dissatisfaction with the course which the House of Lords has been pursuing in recent years and agreement upon the remedy proposed for the correction of the abuses to which this course has led are two very distinct and very different matters. While public opinion in Great Britain may be overwhelmingly against continuing the veto power of the House of Lords in a form which practically renders nugatory the powers conferred by the people upon the representative branch of Parliament, yet it does not follow that this majority will be willing to concede, at least until other means shall be resorted to, that no remedy is possible short of the abolition of the historic chamber.

Nor is it within the bounds of probability that this majority, if appealed to, will sustain the claim that a second chamber shorn of the power of revision and rejection will advance parliamentary efficiency or provide a new safeguard for British democracy. A single chamber, clothed with absolute power over legislation and administration would be an unwelcome substitute even for a system that has manifestly proved undesirable in these latter days.

The House of Lords is itself cognizant of the fact that reform of its composition, procedure and methods is inevitable. Whether it is just beginning to realize the peril of further procrastination, or whether it has seen it from the beginning and has been too stubborn to acknowledge it, is not the question of most importance at present. The vital question is: Will the House of Lords at this juncture take prompt and positive steps toward meeting not merely the Liberal partisan demand but the British popular demand for reform? If even at this late hour it exhibits a disposition not only to accept but to aid in bringing about the reforms for which there is an unmistakable popular demand, the tension will be relieved, and British statesmanship, going about the business calmly, will devise a means whereby the present arbitrary veto power of the Lords shall be discontinued without altogether destroying necessary checks upon hastily considered or unwise legislation.

There are forces operating in the Liberal party to bring about an adjustment of the present constitutional difficulty on lines rather conservative than radical, and behind these forces is the sober-minded public opinion of the United Kingdom.

Now that prices are tumbling many people believe there will be a rebound. Maybe so, but the time to buy is when they are down.

The Corn Club Idea

EVERYBODY who thinks deeply on the subject will sympathize offhand with any project that holds out reasonable promise of winning American boys over to the soil. No purpose could be more worthy than that of properly influencing the farmer's son to remain in the country. Plainly, it can be done in only one way effectually: the farmer's son must be made to understand that the city has no better opportunities to offer him, has no better career in store for him, than what awaits him in the country.

This is the view taken of it by Dr. S. A. Knapp, in charge of farmers' demonstrative work in the department of agriculture. In his belief, if young men can be made to see that farming is a study as worthy of the attention of trained minds as any other branch of productive knowledge, and, as a writer in the Review of Reviews puts it, "that it can be robbed of its old-time drudgery and hardships; that it can be made to pay more even than successful boys can expect for many years in competitive city employments, and that an easy income in early life will the sooner fit them for future influence and power, the problem will be solved."

It is held that the result of Dr. Knapp's work in dealing with the boys whom he has interested in practical agriculture through the medium of what are called "corn clubs" proves the truth of these conclusions. Prof. O. B. Martin of the department has direct supervision of these clubs. The plan is to interest boys between 10 and 18 years of age in corn growing. Agents of the government assist in organizing the clubs, and teachers and business men and all in a neighborhood who may be instrumental in giving the boys encouragement are asked to lend their moral support to the associations.

Under the operation of the club idea, it is said that 46,000 boys are now receiving advanced instruction in agriculture, and in many instances the boys so taught are raising better crops of corn than the adults. The boys manage their clubs. They work at first for prizes, but they soon learn that there is substantial and permanent reward in farming, and they cling to it. In this way thousands of boys who in all probability would have drifted to the city have been induced to remain in the country. This is a tangible gain for the nation, and one that can hardly be measured by its results in one generation.

ALTHOUGH the ordinary reader may be unable or indisposed to take in the details or to follow the processes dwelt upon by some of the speakers at the conference of the National Municipal League in Buffalo, he will extract from the published proceedings, almost at a glance, an idea of the advancement being made toward civic righteousness which will be both impressive and satisfying. For, manifestly, tremendous strides have been made toward honesty and efficiency in American municipal government since the first local municipal league was organized less than a decade ago. The methods by which corrective and reformatory laws are being applied in cities, great and small, throughout the country must strike those who have reasonably long memories as secondary to the fact that these methods are now accepted without a murmur by the city boss and the ward politician.

All is not yet perfect in American municipal government; but looking back a few years and taking even casual note of the progress made, he must be a pessimist, indeed, who is not filled with hope for the future.

GOVERNOR DIX declares that the moment he takes the oath of office as Governor of New York he will divorce himself from politics. He does not need to make such a pledge as this. There are no objections to politics if they are only clean.

The Civic Welfare Movement

It is not difficult to see how an organization such as Director-General Barrett of the Pan-American Union proposes might be made a very serviceable instrument for the bringing about of closer relations between the United States and the Latin republics. The proposal is that a "Pan-American Society of the United States" be formed with headquarters in New York and branches in the other principal cities of the country, its chief purpose being to extend courtesies and hospitality to distinguished South American visitors and "to promote the sentiment of friendship and brotherhood among the American nations through the better acquaintance of their representative men."

It is necessary to an understanding and appreciation of this proposition that the efforts which the United States has been making for the last twenty-five years to win over the favorable opinion and confidence of its Central and South American neighbors should be borne in mind. A Latin-American bureau and Latin-American conferences and an expensive output of Latin-American literature have all been intended to lead to this result. The Pan-American Union has today this end in view primarily. From James G. Blaine's time down the government has not ceased to encourage all legitimate efforts looking to the promotion of better relations with the Latin peoples on these continents. Mexico has not, as a rule, been taken into account in this connection, for the reason that American relations with that country were deemed to be on a most satisfactory footing. Recent events, however, may have the effect of awakening responsible people on both sides of the line to the necessity of concerning themselves more closely with each other's affairs.

At all events, such a society as Director-General Barrett proposes could hardly fail to be a valuable adjunct to the Pan-American Union. Its purposes being purely social, it could go much farther than any department or bureau of the government in the matter of entertaining and instructing visiting South Americans. It is understood, for instance, that the Vice-President of the Argentine Republic, Dr. Victorino de Laplaza, a statesman of exceptional ability, is to visit the United States in January. A visit to the United States by such persons too often means a visit to two or three places on the Atlantic coast, and, perhaps, a run over to Washington. Distinguished visitors from countries which are as yet largely ignorant of the resources and progress of the United States should be induced to see more of the country than what lies along the Atlantic seacoast; they should be enabled to carry back with them to their own countries impressions which, at least, would do justice to a part of the interior of this republic. The proposed society could be useful in enlightening as well as entertaining these visitors; and placed in the care of local branches there is no doubt that the strangers would be given a much clearer and a much more comprehensive insight into the general character of the country and its people than they could otherwise obtain.

Prompt and hearty and substantial cooperation on the part of business men with Director Barrett in this matter will in itself exert a potent influence in forwarding the entire Pan-American movement. It will, moreover, be a fitting answer to those who have predicted early indifference and apathy on the subject of South American trade extension.

Nor the unkindest of all, perhaps, but the costliest is the Culebra cut.

WHEN the voters of Washington ratified an amendment to the state constitution, granting suffrage to women, their action meant that more than one tenth of the nation, so to speak, was committed to that cause. Naturally this victory, adding some 130,000 women to the electorate, is hailed with jubilation by leaders of the movement in that state and in all parts of the country. Five stars on the American woman's suffrage banner in the brief space of years since the movement came to be regarded seriously is a record on which they may well plume themselves when it is considered that cautious man, apparently content in his sole possession of the right to express opinions through the medium of the ballot box, found it neither necessary nor advisable to argue the question of woman's qualifications for or rights to the voting privilege. That time has passed—figures show it—and the woman's suffrage movement is something that must be reckoned with.

So much will have to be admitted, for on looking back we find that Wyoming established woman's suffrage in 1869, Colorado in 1893, Utah and Idaho in 1896, and now Washington joins them. The growth of the movement where full suffrage does not obtain is shown in Kansas, where women possess school suffrage, established in 1887, and bond suffrage, established in 1903. School suffrage for women now prevails in thirty states, including Washington. Most of the states have recognized in some form the right to the ballot of women who pay taxes, and have enacted legislation accordingly. These steps, perhaps, are only forerunners of others that will lead to the elimination of restrictions which bar women in America from voting on every public officer.

It is interesting in this connection to note that women vote for all officers in Great Britain except members of Parliament. In Australia, New Zealand, the Isle of Man and Finland they have full suffrage, and municipal suffrage has been granted them in Ontario, Nova Scotia, Manitoba, Quebec, British Columbia and the northwest territory, Iceland, Denmark and Sweden. In France women engaged in commerce vote for judges of the tribunal of commerce, and in Cape Colony women also have some voting privileges.

The showing already made by the woman's suffrage cause, in fact, is not at all soothing to those who as yet cannot regard it with unqualified favor, although the movement is, of course, looked upon as still experimental when considered in its entirety. Suffragist propagandas have their quiescent spells, but the broad tide thus far has not ebbed appreciably. Results in Colorado and a few other states have been exploited as strong arguments for the cause, and now the experience of Washington will undergo examination. Whether the granting of suffrage to women is a wise proceeding no longer poses as the first question. The immediate thing to determine is how far Washington's example, added to those of four other states, will influence the rest of the nation.

WHEN all is said, Pittsburg's Tech could not wish for a better friend than Andrew Carnegie.
